

## List of Figures

Figure 1. 1: A delafossite type structure .....	4
Figure 2. 1: (a) Sealed Quartz tube (b) Quartz tube after heating treatment (c) Empty Quartz tube used for heating treatment of raw mixture (d) Vacuum sealing facility at the Department of Physics, Faculty of Science, The Maharaja Sayajirao University of Baroda.....	22
Figure 2. 2: Ray diagram depicting Brag's Law .....	25
Figure 2. 3: XRD facility at Department of Metallurgical and Materials Engineering, Faculty of Technology and Engineering, The Maharaja Sayajirao University of Baroda. ....	26
Figure 2. 4: (a) Schematic diagram of Scanning electron microscope [8] (b) SEM instrument Model S 3400 N by Hitachi .....	29
Figure 2. 5: Rayleigh and Raman scattering process .....	31
Figure 2. 6: Raman Facility at Department of Physics, Faculty of Science, The Maharaja Sayajirao University of Baroda.....	31
Figure 2. 7: Infrared Spectrometer Schematic Diagram .....	33
Figure 2. 8: Infrared Spectrometer at Department of Applied Chemistry, Faculty of Technology and Engineering, The Maharaja Sayajirao University of Baroda. ....	34
Figure 2. 9: A typical isomer shift present in a Mössbauer spectrum [18].....	35
Figure 2. 10: Typical quadrupole splitting. 'Δ' gives the magnitude of quadrupole splitting [20].....	36
Figure 2. 11: A typical magnetic splitting of nuclear energy levels[20] .....	37
Figure 2. 12: A typical magnetic splitting of nuclear energy levels [28] .....	37
Figure 2. 13: UV-Vis spectrometer facility at UGC-DAE-CSR, Indore Center.....	40
Figure 2. 14: Attachments for the UV-Vis Spectroscopy for Diffuse reflectance mode at UGC-DAE-CSR, Indore center. ....	40
Figure 2. 15: Representative diagram of the Four probe contacts for current and voltage supplies to the sample.....	41
Figure 2. 16: Low temperature resistivity setup at MIT, MAHE, Manipal .....	41
Figure 2. 17: Dielectric measurement facility at Solid State Physics Division, Bhabha Atomic Research Centre, Trombay. ....	43
Figure 2. 18: Magnetization field (H) dependent magnetic diagrams for different types of magnetic materials .....	45
Figure 2. 19: Hysteresis loop or M-H plot for typical ferromagnetic materials .....	47
Figure 2. 20: Magnetic susceptibility vs temperature (Kelvin) for paramagnetic, ferromagnetic, and antiferromagnetic materials .....	49
Figure 3.1: XRD-patterns of pure CuFeO <sub>2</sub> and doped samples .....	58
Figure 3.2: Experimental X-ray powder diffraction pattern (black line) and calculated pattern (red line) for CuFeO <sub>2</sub> , CuFe <sub>0.96</sub> M <sub>0.03</sub> V <sub>0.01</sub> O <sub>2</sub> (M = Ti, Ga, and Mn) and CuFe <sub>0.96</sub> V <sub>0.04</sub> O <sub>2</sub> . The difference is given as a bottom line. The set of Bragg ticks (blue) corresponds to the R3m space group of delafossite. ....	59
Figure 3.3: Williamson-Hall plot for CuFeO <sub>2</sub> , CuFe <sub>0.96</sub> M <sub>0.03</sub> V <sub>0.01</sub> O <sub>2</sub> (where M = Ti, Ga and Mn) and CuFe <sub>0.96</sub> V <sub>0.04</sub> O <sub>2</sub> samples .....	60
Figure 3.4: Size-strain plot for CuFeO <sub>2</sub> , CuFe <sub>0.96</sub> M <sub>0.03</sub> V <sub>0.01</sub> O <sub>2</sub> (where M = Ti, Ga and Mn) and CuFe <sub>0.96</sub> V <sub>0.04</sub> O <sub>2</sub> .....	61
Figure 3.5: SEM micrographs of CuFeO <sub>2</sub> , CuFe <sub>0.96</sub> M <sub>0.03</sub> V <sub>0.01</sub> O <sub>2</sub> (M = Ti, and Mn) and CuFe <sub>0.96</sub> V <sub>0.04</sub> O <sub>2</sub> ....	63
Figure 3.6: EDS spectrum for CFO (a) and CFMnV (b) .....	64
Figure 3. 7: XRD-patterns of pure CuCrO <sub>2</sub> and doped samples .....	65
Figure 3.8: Peak 012 and 104 (inset) comparison for all the studied samples.....	66

Figure 3.9: Experimental X-ray powder diffraction pattern (black line) and calculated pattern (red line) for $\text{CuCrO}_2$ , $\text{CuCr}_{0.97}\text{Mg}_{0.03}\text{O}_2$ , $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ , and $\text{CuCr}_{1-x}\text{Fe}_x\text{O}_2$ ( $x = 0.03, 0.06$ , and $0.09$ ). The difference is given as a bottom line. The set of Bragg ticks (blue) corresponds to the R3m space group of delafossite.....	67
Figure 3.10: Experimental X-ray powder diffraction pattern (black line) and calculated pattern (red line) for $\text{CuCr}_{0.97}\text{Ni}_{0.03}\text{O}_2$ , and $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Mn, Ga, and Nb}$ ). The difference is given as a bottom line. The set of Bragg ticks (blue) corresponds to the R3m space group of delafossite.....	68
Figure 3.11: Williamson-Hall plot for $\text{CuCrO}_2$ and $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ samples.....	72
Figure 3.12: Williamson-Hall plot for $\text{CuCrO}_2$ , $\text{CuCr}_{0.07}\text{Mg}_{0.03}\text{O}_2$ , $\text{CuCr}_{0.07}\text{Ni}_{0.03}\text{O}_2$ , $\text{CuCr}_{1-x}\text{Fe}_x\text{O}_2$ ( $x = 0.03, 0.06$ and $0.09$ ) and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples.....	73
Figure 3.13: The size-strainplot for $\text{CuCrO}_2$ and $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ samples.....	73
Figure 3. 14: The size-strain plot for $\text{CuCrO}_2$ , $\text{CuCr}_{0.07}\text{Mg}_{0.03}\text{O}_2$ , $\text{CuCr}_{0.07}\text{Ni}_{0.03}\text{O}_2$ , $\text{CuCr}_{1-x}\text{Fe}_x\text{O}_2$ ( $x = 0.03, 0.06$ and $0.09$ ) and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples.....	74
Figure 3.15: SEM micrographs of $\text{CuCrO}_2$ , $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Mn, Ti and Nb}$ ), $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ and $\text{CuCr}_{0.91}\text{Fe}_{0.09}\text{O}_2$ . ....	77
Figure 3.16: EDS spectrum for (a) CCO and (b) CCMnV.....	77
Figure 4.1: $E_g$ and $A_{1g}$ modes of vibration eigen vectors in $\text{ABO}_2$ delafossite compounds .....	83
Figure 4.2: Raman plot for pure and doped $\text{CuFeO}_2$ samples.....	84
Figure 4.3: Experimental (dots) and calculated (solid line) Mossbauer spectra for $\text{CuFeO}_2$ and doped $\text{CuFeO}_2$ samples obtained at room temperature. ....	86
Figure 4.4: FTIR spectra of pure and doped $\text{CuFeO}_2$ .....	88
Figure 4.5: K-M transformed reflectance spectra of pure and doped $\text{CuFeO}_2$ samples.....	89
Figure 4.6: Raman spectra of pure and doped $\text{CuCrO}_2$ .....	90
Figure 4.7: FTIR spectra of pure and doped $\text{CuCrO}_2$ .....	92
Figure 4.8: Kubelka-Munk transformed reflectance spectra of $\text{CuCrO}_2$ , $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Mn, Ga, and Nb}$ ), and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples. ....	93
Figure 4.9: Kubelka-Munk transformed reflectance spectra of $\text{CuCrO}_2$ , $\text{CuCr}_{1-x}\text{Fe}_x\text{O}_2$ ( $x = 0.03, 0.06$ , and $0.09$ ), $\text{CuCr}_{0.97}\text{Mg}_{0.03}\text{O}_2$ , and $\text{CuCr}_{0.97}\text{Ni}_{0.03}\text{O}_2$ samples. ....	94
Figure 5.1: Temperature dependent resistivity of pure and doped $\text{CuFeO}_2$ samples .....	101
Figure 5. 2: Graph of $\ln(\rho/T)$ vs $1/T$ for the resistivity data fitting of SPH model.....	102
Figure 5.3: Variation of $\log \sigma_{ac}$ vs $1000/T$ for $\text{CuFeO}_2$ and $\text{CuFe}_{0.96}\text{Ti}_{0.03}\text{V}_{0.01}\text{O}_2$ sample.....	104
Figure 5.4: Variation of $\log \sigma_{ac}$ vs $1000/T$ for $\text{CuFeO}_2$ and $\text{CuFe}_{0.96}\text{Ti}_{0.03}\text{V}_{0.01}\text{O}_2$ samples near room temperature with linear fit for calculating activation energy.....	104
Figure 5. 5: Plots of ac conductivity with respect to frequency and Johnson's power law fit of $\text{CuFeO}_2$ . ....	105
Figure 5.6: Plots of ac conductivity with respect to frequency and Johnson's power law fit of $\text{CuFeO}_2$ .....	105
Figure 5.7: Temperature-dependent resistivity of $\text{CuCrO}_2$ , $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Mn, Ga, and Nb}$ ), and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples.....	107
Figure 5.8: Temperature-dependent resistivity of $\text{CuCrO}_2$ , $\text{CuCr}_{1-x}\text{Fe}_x\text{O}_2$ ( $x = 0.03$ and $0.09$ ), $\text{CuCr}_{0.97}\text{Mg}_{0.03}\text{O}_2$ , and $\text{CuCr}_{0.97}\text{Ni}_{0.03}\text{O}_2$ samples. ....	107
Figure 5.9: The plot of $\ln(\rho/T)$ versus $1/T$ for the resistivity data fitting by the SPH model of $\text{CuCrO}_2$ and $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Mn, Ga, and Nb}$ ) samples. ....	109
Figure 5.10: The plot of $\ln(\rho/T)$ versus $1/T$ for the resistivity data fitting of SPH model $\text{CuCrO}_2$ , $\text{CuCr}_{1-x}\text{Fe}_x\text{O}_2$ ( $x = 0.03$ and $0.09$ ), $\text{CuCr}_{0.97}\text{Mg}_{0.03}\text{O}_2$ and $\text{CuCr}_{0.97}\text{Ni}_{0.03}\text{O}_2$ samples. ....	110
Figure 5.11: The plot of $\log \sigma_{ac}$ versus $1000/T$ for $\text{CuCrO}_2$ and $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Mn, Ga, and Nb}$ ) and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples. ....	111

Figure 5.12: The plot of $\log \sigma_{ac}$ versus $1000/T$ for $\text{CuCrO}_2$ and $\text{CuCr}_{0.96}\text{Ni}_{0.04}\text{O}_2$ and $\text{CuCr}_{1-x}\text{FeO}_2$ ( $x = 0.06$ and $0.09$ ) samples.....	112
Figure 5. 13: Arrhenius liner fit for $\text{CuCrO}_2$ and $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Mn, Ga, and Nb}$ ) and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples near room temperature.....	113
Figure 5.14: Arrhenius fit for $\text{CuCrO}_2$ and $\text{CuCr}_{0.96}\text{Ni}_{0.04}\text{O}_2$ and $\text{CuCr}_{1-x}\text{FeO}_2$ ( $x = 0.06$ and $0.09$ ) samples near room temperature.....	114
Figure 5. 15: Jonscher Power Law fit of electrical conductivity for $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, and Mn}$ ), $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ , $\text{CuCr}_{0.97}\text{Ni}_{0.03}\text{O}_2$ and $\text{CuCr}_{1-x}\text{FeO}_2$ ( $x = 0.06$ and $0.09$ ).....	115
Figure 5. 16: Variation of exponent 'n' of Jonscher power law vs Temperature.....	116
Figure 6.1: Temperature dependence of magnetic susceptibility of (a) $\text{CuFeO}_2$ and (b) $\text{CuFe}_{0.96}\text{Ti}_{0.03}\text{V}_{0.01}\text{O}_2$ .....	122
Figure 6.2: Temperature dependence of $\chi^{-1}$ along with Curie-Weiss fit for (a) $\text{CuFeO}_2$ and (b) $\text{CuFe}_{0.96}\text{Ti}_{0.03}\text{V}_{0.01}\text{O}_2$ .....	123
Figure 6.3: Isothermal magnetization vs applied magnetic field plots at 25 K, 40 K and 150 K for (a) $\text{CuFeO}_2$ and (b) $\text{CuFe}_{0.96}\text{Ti}_{0.03}\text{V}_{0.01}\text{O}_2$ .....	125
Figure 6.4: Temperature dependence of (a) $\epsilon'$ and (b) $\epsilon''$ of ac dielectric permittivity at different frequencies for the $\text{CuFeO}_2$ sample. The insets of the figures show the variations of the real and imaginary part of $\epsilon$ in the temperature range of 5–50 K. ....	127
Figure 6.5: Temperature dependence of (a) $\epsilon'$ and (b) $\epsilon''$ of ac dielectric permittivity at different frequencies for the $\text{CuFe}_{0.96}\text{Ti}_{0.03}\text{V}_{0.01}\text{O}_2$ sample. The inset of figure (b) shows the fitting of the Arrhenius law .....	128
Figure 6.6: Temperature dependence of magnetic susceptibility of $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Mn, Ti, Nb, and Ga}$ ) samples under 100 Oe Magnetic Field. ....	129
Figure 6.7: Temperature dependence of magnetic susceptibility, $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Nb, Ga, and Mn}$ ), and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples under two magnetic fields 5 KOe and 10 KOe. ....	130
Figure 6.8: Measured M-H hysteresis curves for $\text{CuCrO}_2$ , $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Nb, Ga, and Mn}$ ), and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples at (a) 25 K, (b) 40 K and (c) 150 K. ....	131
Figure 6.9: Magnified M-H hysteresis curves for $\text{CuCrO}_2$ , $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Nb, Ga, and Mn}$ ), and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples at (a) 25 K and (b) 40 K. ....	131
Figure 6. 10: Temperature-dependent dielectric constant of $\text{CuCrO}_2$ and $\text{CuCr}_{0.96}\text{M}_{0.03}\text{V}_{0.01}\text{O}_2$ ( $M = \text{Ti, Mn, Ga, and Nb}$ ) samples. ....	134
Figure 6.11: Temperature-dependent dielectric constant of $\text{CuCr}_{1-x}\text{Fe}_x\text{O}_2$ ( $x = 0.03$ and $0.09$ ), $\text{CuCr}_{0.97}\text{Ni}_{0.03}\text{O}_2$ , and $\text{CuCr}_{0.96}\text{V}_{0.04}\text{O}_2$ samples. ....	134
Figure 7.1: Experimental X-ray powder diffraction pattern (black line) and calculated pattern (red line) for $\text{CuCr}_{0.96}\text{Mn}_{0.03}\text{V}_{0.01}\text{O}_2$ thin film. The difference is given as a bottom line. The set of Bragg ticks (blue) corresponds to the $R\bar{3}m$ space group of delafossite. ....	143
