

List of Plates

Plate No.	Plate	Page no.
4.1	Ambil supplemented to experimental group	82
4.2	Packing of <i>Fructooligosaccharide</i> for distribution	82
4.3	Sterilization of Petri plates in hot air oven	84
4.4	Sterilization of dilution bottles in autoclave	84
4.5	Sterile bottles filled with peptone water used for serial dilution	85
4.6	Preparation of media	86
4.7	Prepared media ready to get in water bath	86
4.8	Mixing of stool sample with peptone water in stomacher to form slurry	87
4.9	Inoculation of bacterial culture in laminar flow	87
4.10	Setting of media using Pour Plate Technique	88
4.11	Petri plates containing media and inoculated bacteria	88
4.12	Anaerobic Jar and Desiccator Placed inside Incubator with plates inoculated with fecal samples for determination of <i>Bifidobacteria</i> , <i>Lactobacilli</i> and <i>Enteric pathogen</i>	89
4.13	Collection of blood sample by an expert lab technician for cortisol analysis	90
5.1	Typical growth of <i>Bifidobacteria</i> , <i>E.coli</i> , and <i>Lactic acid bacteria</i>	138
5.8.1	Glimpse of the scenes from movie made for IEC	140
