

List of Figures

Figure No	Title	Page No
Introduction		
1.1	Estimated contribution of Malnutrition to the disease burden of developing countries	3
Methods & Materials		
3.1	Experimental plan for phase 1	79
3.2	Experimental plan for phase 3	87
Results		
PHASE I		
4.1.1	Prevalence of Underweight in school going children	104
4.1.2	Prevalence of Stunting in school going children	104
4.1.3	Prevalence of Thinness in school going children	105
4.1.4	Age wise trend in the prevalence of malnutrition in the children	109
4.1.5	Prevalence of clinical signs of micronutrient deficiencies	111
4.1.6	Prevalence of Anemia in school going children	125
PHASE II		
4.2.1	Trend in prevalence of Malnutrition over 3 years according to WHO Classification	148
4.2.2	Trends in prevalence of severity of Underweight in children	150
4.2.3	Trends in prevalence of severity of Stunting in children	150
4.2.4	Trend in prevalence of severity of Thinness in children	151
4.2.5	Age wise trend of prevalence of underweight according to WHO 2007 standards	154
4.2.6	Age wise trend of prevalence of stunting according to WHO 2007 standards	157
4.2.7	Age wise trend of prevalence of thinness according to WHO 2007 standards	159
PHASE III (A)		
4.3.1a	Percent prevalence of Underweight (<-2 SD) Z score among children as per WHO 2007 classification	187
4.3.2a	Percent prevalence of stunting (<-2 SD) Z score among children as per WHO 2007 classification	187
4.3.3a	Percent prevalence of Thinness (<-2 SD) Z score among children as per WHO 2007 classification	188
4.3.4a	Frequency Distribution of Hemoglobin levels of children in IFA+ DW intervention Group	195
4.3.5a	Impact of Weekly IFA along with Deworming and deworming alone on severity of Hemoglobin level	198
4.3.6a	Impact of Intervention on the percent prevalence of Anemia among children	199
PHASE III (B)		
4.3.1b	Washout effect on Prevalence of Underweight	216
4.3.2b	Washout effect on Prevalence of Stunting	217
4.3.3b	Washout effect on Prevalence of Thinness	218
