## CONTENTS

|    | Introduction                                   | 1          |
|----|--|------------|
| 1. | A histochemical study of fat in the red and    |            |
|    | white fibres of fish skeletal muscle           | $\epsilon$ |
| 2. | Histochemical demonstration of glycogen and    |            |
|    | certain glycolytic and pentose cycle enzymes   |            |
|    | in the muscle of Cirrhina mrigala              | 27         |
| з. | Histochemical study of fat and certain enzymes |            |
|    | related to fat metabolism in the muscle of     |            |
|    | Cirrhina mrigala                               | 40         |
| 4. | A quantitative study of fat, glycogen, lipase  |            |
|    | and succinic dehydrogenase in fish muscle      | 53         |
| 5. | Cellular organization and fat utilization in   |            |
|    | fish muscle                                    | 65         |
| 6. | Lipase and succinic dehydrogenase activities   |            |
|    | in the particulate fractions of the fish       |            |
|    | red muscle                                     | 80         |
| 7. | Histochemical demonstration of muscle lipase   | 91         |
| 8. | Acid and Neutral ATPases in skeletal muscle    | 101        |
| 9. | Effect of stimulation on Acid ATPase in        |            |
| 5  | skeletal muscle                                | 118        |
|    | Summary  | 128        |
|    | Bibliography                                   | 133        |
|    | Addendum to Bibliography                       | 164        |
