

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
2.1	Cricket on the Artillery Ground	12
2.2	Early village cricket	13
2.3	The first instances of cricket	13
2.4	Anerobic glycolysis	15
2.5	Krebs cycle	16
2.6	Electron transport chain	17
2.7	Overlap of all three energy systems during moderate intensity exercise from the onset to steady state	19
2.8	Overlap of all three energy systems during maximal-intensity exercise from the onset to volitional fatigue	19
2.9	Urine colour chart- Pee test	41
2.10	Mechanism of muscle damage	60
2.11	Theoretical model of muscle damage and repair cycle	61
3.1	Study design of phase 1	82
3.2	Sensory Evaluation of the Experimental and Placebo drink by the semi-trained panel members	98
3.3	Experimental design for phase 2(B)	99
3.4	Study design of phase 3	103
4.1	Nutritional status based on BMI of participants from Ranji boys, U-23 boys, Senior women and U-19 women squads	112
4.2	Prevalence of abdominal obesity based on Waist Circumference, Waist Hip Ratio, and Waist Height Ratio in participants from Ranji boys, U-23 boys, Senior women and U-19 women squads	113
4.3	Categorization of cricketers across all the squads based on fat levels	117
4.4	Categorization of cricketers across all the squads based on Percent Lean body mass levels	118
4.5	Eating Preference of the cricketers	119
4.6	Categorization of the participants from Ranji boys, U-23 boys, Senior women and U-19 women into normal, mild anemia and moderate anemia based on the haemoglobin levels (N=64)	127
4.10	Percent distribution of various forms of Protein supplements	140
4.11	Protein content per 100g of Protein Supplements	141
4.12	Source of Protein in the Supplements under Study	142
4.13	Mean cost per gram of protein supplements based on the protein source	143
4.14	Presence of Sugar/Sweetener in Protein Supplements	144
4.15	Percent distribution of various forms of Sports drinks	146
4.16	Carbohydrate content per 100 ml of Sports drinks	146
4.17	Most commonly added sources of Carbohydrates in the Sports drinks under Study	147
4.18	Sodium content per 100 ml of Supplements	148
4.19	Categorisation of participants from Ranji boys, U-23 boys, Senior women and U-19 women based on baseline nutrition knowledge scores	163
4.20	Post-intervention knowledge scores among cricketers across all the squads	177
