

## *LIST OF PLATES*

Plate no.	Title	Page no.
4.1(a-f)	Steps in determination of inulin content in food samples	88
4.2 (a-f)	Development and organoleptic evaluation of inulin incorporated products	96
4.3	Laminar flow	114
4.4	Anaerobic jar and dessicator placed inside incubator	115
4.5	Carbohydrate fermentation kit used for identification of bacterial species	115
4.6	Probiotic fermented milk supplemented in elderly subjects	116
4.7a	Method of distribution of 200 g probiotic fermented Milk and addition of inulin into 100 g packaging	117
4.7 b	Inoculation of plates with the sample in laminar flow	117
4.7 c	Probiotic bacteria counting in colony counter instrument	117
5.1	<i>Bifidobacterium</i> counts before supplementation of synbiotic fermented	221
5.2	<i>Bifidobacterium</i> counts after supplementation of synbiotic fermented milk	221
5.3	<i>Lactic acid bacteria</i> counts before supplementation of synbiotic fermented milk	222
5.4	<i>Lactic acid bacteria</i> counts after supplementation of Synbiotic fermented milk	222
5.5	<i>E. coli</i> counts before supplementation of synbiotic fermented milk	223
5.6	<i>E. coli</i> counts after supplementation of synbiotic fermented milk	223
