

A C K N O W L E D G E M E N T S

The author has great pleasure in expressing her long-standing debts of gratitude to Dr. A.R.Chavan, Professor of Botany, M. S. University, Baroda, for his able guidance and helpful criticisms throughout the course of these studies.

She is also grateful to the President, Chief Executive Officer, Water Works Superintendent and the Deputy Engineer, Nimeta Water Works, all of the Baroda Borough Municipality for their hospitality and for affording her all facilities for carrying out the investigations contained in Part I of the thesis including the use of their motor conveyance and boat on the Ajwa Reservoir.

Acknowledgement must be made to Shri R.S. Mehta, Director, C.P.H.E.R.I., for permitting her to work for the Ph.D. degree under the guidance of Professor A.R.Chavan of the Maharaja Sayajirao University, Baroda; and also to the staff of the Ahmedabad Field Centre who had readily helped her in the physico-chemical and bacteriological examinations.

She would like also to thank Professor C.V.Ramkrishnan, Head of the Biochemistry Department of the M.S.University for permitting her to work in his laboratory and Shri H. R. Chokshi, Lecturer in the same department for help in carrying out the flame photometry tests.

Her thanks are also due to Dr. Merh, Professor

## VI

of Geology in the M.S.University, Baroda, for furnishing her with information on the geology of the Ajwa reservoir catchment area at Baroda.

Her special thanks are due to Dr. Kurt Wulfert of East Germany for help in the correct identification of the Rotifer fauna and through him of the other groups of zoo-plankton organisms.

To Dr. Francis Drouet of the Academy of Natural Sciences of Philadelphia, U.S.A., for help in the correct identification and confirmation of phyto-plankton organisms excluding diatoms; to Dr. C.W.Reimer, Curator, Department of Limnology and to his assistant, Miss Roberts also of the Academy of Natural Sciences of Philadelphia for help in the correct identification and confirmation of diatoms; and lastly to Dr. W.T. Calaway of the University of Florida, U.S.A. for help in the identification of nematodes and oligochaetes, the author is deeply indebted.

Lastly, the author will be failing in her duty if she did not express her sincere thanks to Shri M.J. Kakkad, the City Engineer of Ahmedabad Municipal Corporation, Ahmedabad for his great help in the construction of all the oxidation ponds in the Pirana Sewage Farm and in furnishing her with all the engineering and hydraulic data relating to them. But for this help it would not have been possible for the author to carry out the researches contained in Part II of her thesis.
