

LIST OF TABLES

<u>Serial Number</u>	<u>Table Number</u>	<u>Description</u>	<u>Page</u>
1	2.1	Stratigraphic succession of the Heran basin.	28
2	3.1	Chrono-tectonic analysis of fracture lineaments and their hydrogeological significance.	72
3	4.1	Significance of geological controls on drainage pattern.	111
4	5.1	Average montly normals of temperature and relative humidity.	115
5	5.2	Mean monthly wind velocity	119
6	5.3	Stationwise annual and mean rainfall	121
7	5.4	Weighted area precipitation analysis of the Heran river basin.	124
8	5.5	Monthly evaporation losses in study area	130
9	5.6	Monthly observed run-off at Rajwasana weir.	133
10	6.1	Phreatic aquifer characteristics in the study area.	171
11	6.2	Characteristics of semi-confined aquifers in the study area.	172
12	6.3	Geohydrological parameters of the study area.	173
13	7.1	Quantitative interpretation of Schlumberger VES curves in the Heran river basin.	215
14	8.1	A comprehensive detail of groundwater potential in the study area.	248
15	8.2	Chemical analysis of groundwater samples.	249
