

ACKNOWLEDGEMENTS

The work was carried out at the Department of Geology, The M.S.University of Baroda which is acknowledged with gratitudes.

Many people have helped me during preparation of the thesis and during my field investigations. Amongst these Shri B.S. Chavan and Shri C.P. Mistry both from the Department of Geology needs a special mention. Shri Chavan did the excellent photographic work. Shri Mistry prepared the Line-drawings. Rough typescript was prepared by Miss Priti Patel. The final typing of the thesis was neatly done by my friend Shri D.M. Mohite of Botany department. The author extends his sincere thanks to all these friends.

The enthusiasm and encouragement of my old parents, my wife and children are largely responsible in achieving this landmark of my self guided thesis work, when my earlier attempt could not hold success.
