CHAPTER-I INTRODUCTION

1.1	India's Emergence towards Self –Sufficiency in Hydrocarbons	01
1.1.1	E&P Efforts by PSU's	03
1.1.2	Uses of Crude Oil	04
1.1.3	History of Crude Oil	06
1.1.4	Essentials in creation of crude oil	06
1.1.5	Technical and Economic Risks in Exploration	08
1.1.6	Production of crude oil	08
1.1.7	Transportation of crude oil	09
1.1.8	Refining of crude oil	11
1.1.9	Gross Character of Petroleum	12
1.1.10	Constituents of Petroleum	13
1.1.11	Crude oil waxes	15
1.1.12	Nature of waxes	17
1.1.13	Classification of Waxes	17
1.1.14	Wax crystal morphology	18
1.1.15	Nucleation and growth of the solid phase	19
1.1.16	Mechanism of wax crystal modifier	21
1.1.17	Asphaltenes	23
1.1.18	Structure and Chemistry of Asphaltenes	24
1.1.19	The Physical Interaction of Asphaltenes, Resins, Waxes and the Oil Medium	26
1.1.20	Mechanism of deposition in crude oil	27
1.1.21	Review of deposition in crude oil	30
1.1.22	Rheology- A Detailed study	31
1.1.23	Types of rheological behaviour	33
1.1.24	Flow Models	35
1.1.25	Viscometers employed to measure viscosity	36
1.1.26	Effect of temperature on the viscosity of crude oil with polymeric additives	38
1.1.27	Chemical Additives	39
1.1.28	Pour point depressants	39
1.1.29	Mechanism of pour point depression	39
1.1.30	Testing of Performance of PPD's	44
1.1.31	Types of crude oils	45
1.1.32	Physico-chemical Characteristics of crude oil	46
1.1.33	Techniques for control of Paraffin deposits	54
1.1.34	Outline of the Thesis	56
	AIMS AND SIGNIFICANCE	57

CHAPTER-II PROCEDURE FOR LABORATORY PREPARATION OF POUR POINT DEPRESSANTS

2.1	General	59
2.2	Procudure I	63
	Synthesis of Diester of poly (n-alkyl acrylate-co-maleic anhydride) dibenzylate	
2.2.1	Reagents	63
2.2.2	Preparation of acrylic acid esters	63
2.2.3	Analysis and characterization	64
2.2.4	Copolymerization of n-alkyl acrylate with maleic anhydride anhydride	65
2.2.5	Analysis and characterization	66
2.2.6	Diesterification of anhydride copolymer	67
2.2.6	Analysis and characterization	68
	Procudure II	69
2.3	Synthesis of Diester of poly(n-alkyl oleate-co-maleic anhydride) dialkylate	
2.3.1	Preparation of Oleic acid ester	69
2.3.1.1	Analysis and characterization	70
2.3.2	Copolymerization of alkyl oleate with maleic anhydride	71
2.3.2.1	Analysis and characterization	51
2.3.3	Diesterification of anhydride copolymer	72
2.3.3.1	Analysis and characterization	73
2.4	Procedure III	74
	Synthesis of Diester of Poly(n-alkyl methacrylate-co-maleic anhydride) dibenzylate	75
2.4.1	Preparation of methacrylic acid ester	76
2.4.1.1	Analysis and characterization	76
2.4.2	Copolymerization of alkyl methacrylate with maleic anhydride	76
2.4.2.1	Analysis and characterization	77
2.4.3	Diesterification of anhydride copolymer	77
2.4.3.1	Analysis and characterization	78
2.5	Procedure IV	79
	Synthesis of poly (benzyl undecylenate-co-maleic anhydride) dialkylate	
2.5.1	Preparation of undecylenic acid ester	79
2.5.1.1	Analysis and characterization	80
2.5.2	Copolymerization of alkyl undecylenate with maleic anhydride	81
2.5.2.1	Analysis and characterization	82
2.5.3	Diesterification of anhydride copolymer	83
2.5.3.1	Analysis and characterization	83

CHAPTER-III APPLICATIONS OF SYNTHESIZED POLYMERS

ADDITIVES ON CRUDE OILS

3.1.1	Area selected for study of this work	84
3.1.2	Field History	84
3.1.3	Reaction Schema for the synthesis of chemical additives	86
3.1.4	Performance Testing of PPD	92

CHAPTER-IV-I TESTING OF SYNTHESIZED POLYMER ADDITIVES ON GANDHAR FIELD CRUDE OIL

4.1	Physico-chemical Properties of Gandhar crude oil	96
4.1.2	Pour Point study results with the selected doses	98
4.1.3	Rheological study results	100
4.1.4	Rheological studies on TA AR500 Rheometer	105
4.1.5	Microscopic studies of Gandhar oil	152
4.1.6	Cold Finger Test on Gandhar crude oil	153
4.1.7	Discussion	153

CHAPTER-IV-II TESTING OF SYNTHESIZED POLYMER ADDITIVES

ON KOSAMBA FIELD CRUDE OIL

4.2.1	Physico-chemical Properties of Kosamba crude oil	161
4.2.2	Kosamba field Wax Deposit Analysis	163
4.2.3	Pour Point Analysis of Kosamba oil	163
4.2.4	Rheological Studies results of Kosamba oil	164
4.2.5	Rheological studies on TA Rheometer	170
4.2.6	Cold Finger Test on Kosamba crude oil	198
4.2.7	Discussion	199

CHAPTER-IV-III TESTING OF SYNTHESIZED POLYMER ADDITIVES

ON NADA FIELD CRUDE OIL

4.3.1	Physico-chemical Properties of Nada crude oil	203
4.3.2	Nada field Deposit Study	204
4.3.3	Pour point studies	205
4.3.4	Rheological Studies results of Nada oil	206
4.3.5	Rheological Studies on Nada oil on Rheometer	211
4.3.6	Cold Finger Test on Nada crude	255
4.3.7	Discussion	255

CHAPTER-V SUMMARY AND CONCLUSION 259
