

## LIST OF TABLES

Sl. No	Title	Pg. no
1.1	Estimated population and educational status of adolescents in India.	2
3.1	Blue print of the research design.	46
4.1	Mean comparison test between Tibet born and exile born on psychosocial parameters.	60
4.2	Mean comparison test between students with privilege of vacation and students without privilege of vacation on psychosocial parameters.	62
4.3	Mean comparison test among adolescents who meet family in different time intervals on psychosocial parameters.	65
4.4	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparisons on school stress.	68
4.5	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparisons on future stress.	69
4.6	Summary of ANCOVA showing pre-test scores, post-adjustment on scores and pair wise comparisons on home stress.	70
4.7	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparisons on peer stress.	71
4.8	Summary of ANCOVA showing pre-and post-adjustment scores and pair wise comparisons on leisure stress.	72
4.9	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparison on opposite sex stress.	73
4.10	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparisons on self stress.	74
4.11	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparisons on state anxiety.	75

Sl. No	Title	Pg. no
4.12	Summary of ANCOVA showing pre-and post-adjustment scores and pair wise comparisons on trait anxiety.	76
4.13	Summary of ANCOVA showing pre- and post- adjustment on scores and pair wise comparisons on active coping.	78
4.14	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparisons on internal coping.	79
4.15	Summary of ANCOVA showing pre- and post-adjustment ion scores and pair wise comparisons on withdrawal coping.	80
4.16	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparisons on self-confidence.	81
4.17	Summary of ANCOVA showing pre- and post-adjustment scores and pair wise comparisons on emotional intelligence.	82
4.18	Regression analysis for life skill group 'A' predicting school stress among Tibetan adolescents.	85
4.19	Regression analysis for life skill group 'B' predicting school stress among Tibetan adolescents.	86
4.20	Regression analysis for life skill group 'A' predicting future stress among Tibetan adolescents.	88
4.21	Regression analysis for life skill group 'B' predicting future stress among Tibetan adolescents.	90
4.22	Regression analysis for life skill group 'A' predicting home stress among Tibetan adolescents.	91
4.23	Regression analysis for life skill group 'B' predicting home stress among Tibetan adolescents.	92

Sl. No	Title	Pg. no
4.24	Regression analysis for life skill group 'A' predicting peers stress among Tibetan adolescents.	93
4.25	Regression analysis for life skill group 'B' predicting peer stress among Tibetan adolescents.	94
4.26	Regression analysis for life skill group 'A' predicting leisure stress among Tibetan adolescents.	95
4.27	Regression analysis for life skill group 'B' predicting leisure stress among Tibetan adolescents.	96
4.28	Regression analysis for life skill group 'A' predicting opposite sex stress among Tibetan adolescents.	98
4.29	Regression analysis for life skill group 'B' predicting opposite sex stress among Tibetan adolescents.	99
4.30	Regression analysis for life skill group 'A' predicting self stress among Tibetan adolescents.	100
4.31	Regression analysis for life skill group 'B' predicting self stress among Tibetan adolescents.	101
4.32	Regression analysis for life skill group 'A' predicting state anxiety among Tibetan adolescents.	103
4.33	Regression analysis for life skill group 'B' predicting state stress among Tibetan adolescents	104
4.34	Regression analysis for life skill group 'A' predicting trait anxiety among Tibetan adolescents.	107
4.35	Regression analysis for life skill group 'B' predicting trait anxiety among Tibetan adolescents.	107
4.36	Regression analysis for life skill group 'A' predicting active coping among Tibetan adolescents.	109
4.37	Regression analysis for life skill group 'B' predicting active coping among Tibetan adolescents.	110
4.38	Regression analysis for life skill group 'A' predicting internal coping among Tibetan adolescents.	111

Sl. No	Title	Pg. no
4.39	Regression analysis for life skill group 'B' predicting internal coping among Tibetan adolescents.	112
4.40	Regression analysis for life skill group 'A' predicting withdrawal coping among Tibetan adolescents.	113
4.41	Regression analysis for life skill group 'B' predicting withdrawal coping among Tibetan adolescents.	114
4.42	Regression analysis for life skill group 'A' predicting self-confidence among Tibetan adolescents.	116
4.43	Regression analysis for life skill group 'B' predicting self-confidence among Tibetan adolescents.	117
4.44	Regression analysis for life skill group 'A' predicting emotional intelligence among Tibetan adolescents.	119
4.45	Regression analysis for life skill group 'B' predicting emotional intelligence among Tibetan adolescents.	120
4.46	Mean comparison test between Tibet born and exile born adolescents in the post-test scores across psychosocial parameters.	123
4.47	Mean comparison test between Tibet born and exile born adolescents across life skill parameters.	126
4.48	Mean comparison test between males and females in the post-test scores across psychosocial parameters.	128
4.49	Mean comparison test between males and females across life skill parameters.	131
4.50	Mean comparison test between students with and without privilege of vacation on the post-test scores across psychosocial parameters.	133
4.51	Mean comparison test between adolescents with privilege of vacation and adolescents without privilege of vacation across life skill parameters.	135

Sl. No	Title	Pg. no
4.52	Mean comparison test among students who meet family indifferent time intervals on psychosocial parameters in the post-test scores.	137
4.53	Mean comparison test among students who meet family indifferent time intervals across life skill parameters.	140
4.54	Mean comparison test between experimental and control group on psychosocial parameters in the post-test scores.	141
4.55	Mean comparison test between Tibetan and Indian adolescents on psychosocial parameters.	144
4.56	Correlation matrix between Tibetan and Indian adolescents on psychosocial parameters.	152
4.57	Coping, self-confidence and emotional intelligence as predictors of stress and anxiety among Tibetan and Indian adolescents.	153
