

Acknowledgements

My sincere gratitude to respected guide **Prof. Dr. Uliyar.V Mani, Head & Coordinator, a WHO Collaborating Centre for Anemia Control and Diet related Non Communicable Diseases, The M.S University of Baroda, Vadodara** for his constant encouragement, guidance and also providing the conducive atmosphere throughout the study. His discipline and dedication in research work has always inspired me to carry out my work with enthusiasm. With his outstanding knowledge and vast research experience in the subject, he has guided me to perform this work to the best of my abilities. I remain deeply grateful to him for all the help and valuable suggestions for the successful completion of my thesis.

Sincere thanks are acknowledged to **Dr. Mahendra Narwaria**, Surgical Gastroenterologist, Ahmedabad, Gujarat for graciously accepting to be the Clinical Supervisor, of this study despite of his busy schedule. Similarly, thanks to other Consultant Surgical Gastroenterologists practicing at Ahmedabad, Gujarat Dr. Nilay Mehta, Dr. Hitesh, Dr. Rupesh Mehta, Dr. Premal Desai, Dr. Kaushal Vyas for helping me in selection of the subjects and cooperating in this clinical study.

I am equally extremely thankful to **Dr.(Mrs) Indirani Mani** for her valuable guidance, encouragement and support right from the beginning of the Doctoral programme till the completion of thesis writing. She had been my best counselor and had given me valuable suggestions related directly or indirectly to the study. I am indeed very opportunistic to have Prof.Dr. Mani and Dr.(Mrs) Mani as my superior. Word of 'Thanks' is too small to say in return for the help they have provided to me.

My grateful acknowledgement to the **Dean Dr. Prerna Mohite, Faculty of Home Science, The M.S. University of Baroda, Vadodara** for providing facilities for smooth conduct of the study.

My thanks are due to **Prof. Dr. Uma Iyer** for her constant encouragement and support in carrying out this study.

Sincere thanks are acknowledged to the staff members of the Department of Foods and Nutrition, The M.S. University of Baroda, Vadodara for their ever willing cooperation and support and even more so for simply being there for me in the time of difficulty.

In all I do particularly whatever I manage to do well I am indebted to my uncle **Mr. Samir Bhattacharjee**, CEO, for constantly keeping me on the track through his constant

encouragement and guidance. Sincere thanks acknowledgement to my friend **Mr. Mayur Dave**, GM, for his constant encouragement, guidance and support.

Special acknowledgement is due to **subjects for their generous participation** in the nutrition supplementation in this study, without which it could not have been possible.

Finally and most of all I am grateful to my family. My mother, **Mrs. Anuva Choudhury**, stimulated my interest in Nutrition and Dietetics. It is the subsequent help and encouragement of my parents that I could pursue deeper knowledge this branch. While practicing as a Clinical Dietician in the ICUs of the superspecialty hospitals, the need was felt to develop nutritional support for the lower socioeconomic group. It is the constant encouragement of my father, **Dr. Ajoy Kumar Choudhury**, Retd. Chief Scientist, which prompted me to undertake this doctoral programme and today with the valuable guidance of Prof. (Dr)U.V Mani I could make an effort to develop kitchen based polymeric enteral diets with subsequent substrate enrichment with enteral glutamine. Today I cannot express in writing the help, support and encouragement my father had contributed towards carrying out this study. *My father had shown me the way and my mother had enabled me to believe that I can follow it.*

It is with pleasure that I acknowledge the constant assistance of my sister **Ms. Ipsita Choudhury**, Clinical Microbiologist and supporting me in every step including typing some chapters inspite of her busy schedule in bringing about the final stage of this study. I am indeed very opportunistic to have her as my friend 'need and indeed' more than as a sister.

Thanks are acknowledged to all those who were not acknowledged so far in advertently or oversight for their contribution in making this present research study possible.

I hope that the findings will help to contribute an important pedestal to the profession in popularising the nutrition area and even help the general clinicians to realise the importance of nutritious life support in understanding that '*it greatly reduces complications in surgery cases*'.

***With pride and more love I dedicate this present
Doctoral Dissertation to my Parents.***

Jayeeta Chowdhury
