Chapter	Title		Page
1	INTRODUCTION		1-9
	1.1	Rivers of Gujarat	2
	1.2	Estuaries	4
	1.2.1	The Estuary Definitions	4
	1.3	Sea Water Intrusion Problem in Coastal Aquifers	5
	1.3.1	Abrupt Interface Approach	6
	1.3.2	Hydrodynamic Dispersion Approach	6
	1.3.3	Sea Water Intrusion Problem in Coastal Aquifer Overlain by an Estuary	6
	1.4	Purpose of Artificial Recharge Structures in Estuarine Area	7
	1.5	Scope and Objectives of The Study	7
	1.6	Closure	9
2	LITERATURE REVIEW		10-29
	2.1	Estuaries and Related Problems	10
	2.1.1	Engineering Problems in Estuaries	10

	2.2	Estuary Dynamics	11
	2.2.1	Salinity Transport in Estuaries	12
	2.2.2	Estuary Mixing Types	12
	2.2.2.1	Highly Stratified Type	13
	2.2.2.2	Partially Mixed Type	13
	2.2.2.3	Well-Mixed Type	14
	2.2.3	Estuarine Area's Problems of World	15
	2.2.4	Estuarine Area's Problems of India	17
	2.3	Surface Water Models for Estuarine Area	17
	2.4	Water Quality Studies in Estuarine Area	20
	2.5	Coastal Groundwater Models	24
3	CASE STUDY AREA AND DETAILS		30-54
	3.1	Study Area	31
	3.1.1	Geographical Location of Study Area	31
	3.2	Mahi River	34
	3.2.1	Mahi Basin	35
	3.2.2	Tributaries of Mahi	36
	3.2.2.1	Mini River	37
	3.2.3	Water Resources Projects on River Mahi	37
	3.2.3.1	Mahi Right Bank Canal Project	38
	3.2.3.2	Mahi Right Bank Canal Command Area	38
	3.2.3.3	Radial Collector Wells	39

	3.2.3.4	Mahi Tidal Regulator Cum Recharge Scheme	41
	3.2.4	Water Resources Projects on Tributaries of River Mahi	42
	3.3	Mahi Estuary	42
	3.3.1	Tidal Range in Mahi Estuary	43
	3.4	Details of Study Area	44
	3.4.1	Topography of Study Area	44
	3.4.2	Climate of Study Area	44
	3.4.3	Temperature of Study Area	45
	3.4.4	Humidity	45
	3.4.5	Cloudiness	46
	3.4.6	Winds	46
	3.4.7	Rainfall	46
	3.4.8	Special Weather Phenomena in Study Area	47
	3.4.9	Geology	47
	3.4.10	Soils in the Study Area	48
	3.4.11	Vadodara Branch Canal	52
	3.4.12	Effluent Channel Project, Vadodara (E.C.P.)	53
4	DATA COLLECTION & METHODOLOGY		55-96
	4.1	RL's of Mahi River Water Level	55
	4.2	RL's of Ground Level of Wells and River Bed	59
	4.3	RL's of Bottom of Wells in Unconfined Aquifer	59
	4.4	Horizontal Permeability 'HK' Of Wells in an Unconfined Aquifer	59

	4.5	Specific Yield 'Sy' of Wells in Unconfined Aquifer	60
	4.6	Lithology Data	61
	4.7	Reduced Water Level of Wells	61
	4.8	Water Quality Data of Wells	67
	4.9	Rainfall Data	70
	4.10	Recharge Data	71
	4.11	Conductance for the River	72
	4.12	GMS 6.0 Software	76
	4.12.1	MODFLOW	76
	4.12.2	The Conceptual Model Approach	77
	4.12.3	Advantages of the Conceptual Model Approach	77
	4.12.4	Groundwater Flow Equation Used In MODFLOW	78
	4.13	Groundwater Modelling	81
	4.13.1	Assumptions and Considerations in Model Analysis	82
	4.13.2	Construction of the Model for the Study Area	82
	4.13.2.1	Base Map Preparation	83
	4.14	Conceptual Model of the Aquifer System	83
	4.14.1	Fence Diagram, Solids and Longitudinal Sections	84
	4.15	Three Dimensional Model for Present Study	88
	4.15.1	Setting up the Recharge Zones	88
	4.15.2	Setting up the Horizontal Permeability Zones	88
	4.15.3	Setting up the Specific Yield Zones	89

	4.15.4	Setting up the Location of River Mahi	89
	4.16	Creating the 3D Grid	90
	4.17	Starting Heads to the Model	91
	4.18	Boundary Conditions	92
	4.19	Regression Analysis	95
	4.19.1	Year Wise Variation in TDS With Reference to Rainfall	96
5	MODEL SIMULATION		97 -136
	5.1	Calibration of Groundwater Model	97
	5.1.1	Automated Parameter Estimation	99
	5.1.2	Period of Calibration Simulation	99
	5.1.3	Input Parameters for Calibration	99
	5.1.4	Setting up the Stress Periods	102
	5.1.5	Results of Calibration	103
	5.2	Validation of Groundwater Model	107
	5.2.1	Period of Validation Simulation	108
	5.2.2	Input Parameters for Validation	108
	5.2.3	Setting up the Stress Periods	109
	5.2.4	Results of Validation	110
	5.3	Predictive Groundwater Modelling	112
	5.3.1	Period of Predictive Simulation	113
	5.3.2	Operational Runs	113
	5.3.3	Input Parameters for Predictive Simulation	115

	5.3.4	The Stress Periods	116
	5.3.5	Results of Prediction Scenarios	117
6	REGRESSION ANALYSIS OF WATER QUALITY DATA		137-172
	6.1	Regression Analysis	137
	6.1.1	Linear Regression Analysis	138
	6.1.2	Multiple Linear Regression Analysis for Three Parameters	146
	6.1.3	Multiple Linear Regression Analysis for Four Parameters	152
	6.1.4	Year Wise Variation in TDS With Reference to Rainfall	154
	6.2	Lab Analysis for Water Quality	157
	6.2.1	Graphical Analysis	159
7	RESULTS and DISCUSSIONS		173-182
	7.1	Results, Discussions on Regression & Graphical Analysis	173
	7.2	Results, Discussions on Lab as well as Graphical Analysis	176
	7.2.1	Considering Distances from Kavi (Sea) in Mahi Estuarine Area	176
	7.2.2	Considering Distances from Mahi River in Mahi Estuarine Area	179
	7.2.3	Considering Location of Villages on Right or Left Bank	182
8	CONCLUSIONS		183-187
	8.1	Summary	183
	8.2	Conclusions	183
	8.3	Research Contributions	186
		Scope of Further Study	187
