

CONTENTS

Chapters	PAGE
Introduction.	1
1. Experimental protocol, material and methods.	11
2. Influence of estrous cyclicity on certain metabolic alterations in submandibular gland of female rat.	16
3. A study of alterations induced by spaying in glycogen concentrations and some enzymes concerned with carbohydrate metabolism of submandibular gland.	22
4. Influence of administration of 17β - estradiol to ovariectomized rats on some aspects of carbohydrate metabolism of submandibular gland.	28
5. A study on the effects of simultaneous administration of 17β - estradiol and progesterone on certain metabolic patterns of submandibular glands	35
6 Influence of ovarian hormones on the sialic acid concentration in the submandibular gland of female albino rats.	40
7 Significance of histochemical variations in 3α -, 3β -, and 17β - hydroxysteroid dehydrogenase activities of submandibular gland of rat under the influence of estrous cyclicity.	47
Summary	54
General consideration	58
Bibliography	68
