Chapter 1

Fullerene-The Third Allotropic Form of Carbon

Page No.

1.1. Fullerenes

1.1.1	Introduction.....	1
1.1.2	Production	2
1.1.3	Structure	3
1.1.4	Physical Properties	7
1.1.5	Chemistry	8
1.1.6	Applications	14
1.1.7	Solubility of [60]fullerene.....	18
1.1.8	Supramolecular host-guest complexes of [60]fullerene with various water-soluble hosts.....	20
1.1.8.1	Lysozyme.....	21
1.1.8.2	Calixarenes.....	23
1.1.8.3	Cyclodextrins.....	28
1.2.	Microemulsions	
1.2.1	Surfactant Aggregates or Micelles	33
1.3.	Aim of the Thesis.....	36

Chapter 2

Experimental

2.1. Host-Guest complexes of [60]fullerene

2.1.1 Lysozyme as a biomolecule and its interaction with [60]fullerene

2.1.1.1 Synthesis of [60]fullerene-lysozyme adduct.....

38

2.1.2 [60]fullerene its formation of reverse micelles and its microemulsion studies with various non-ionic surfactants.

2.1.2.1 [60]fullerene in Reverse micelles.....

40

2.1.2.2 Microemulsion studies.....

41

2.1.3	Calix[8]arene as a host molecule for [60]fullerene	
2.1.3.1	Synthesis of p-tert-butyl Calix[8]arene.....	43
2.1.3.2	Synthesis of p-H Calix[8]arene.....	44
2.1.3.3	Synthesis of p-SulfonatoCalix[8]arene.....	44
2.1.3.4	Synthesis of water-soluble [p-(N, N-Diallylaminomethyl)] Calix[8]arene.....	45
2.1.3.5	Synthesis of water-soluble calix[8]arene-[60]fullerene complexes.....	46
2.1.3.	Cyclodextrins as a host molecule for [60]fullerene	
2.1.4.1	Water-soluble solvent Free Synthesis of γ , β -cyclodextrin - [60]fullerene Complex.....	49
2.1.4.2	Photolysis of capped fullerene (γ -CD-C ₆₀).....	50

2.2. Characterization

Chapter 3

Results & Discussion

3.1	Lysozyme as a biomolecule and its interaction with [60]fullerene.....	54
3.2	[60]fullerene-its formation of reverse micelle and microemulsion studies.	
3.2.1	Critical Reverse Micelle Formation.....	61
3.2.2	Microemulsion formation.....	67
3.2.2.1	Effect of Various Surfactant and Co-Surfactant.....	71
3.2.2.2	Effect of change in concentration of solvent.....	78
3.2.2.3	Phase behavior study.....	83
3.2.2.4	Effect of change in Temperature on phase behavior.....	92
3.2.2.5	Mixed Surfactant Study.....	101
3.2	Calix[8]arene as a host molecule for [60]fullerene.....	105
3.4.	Cyclodextrin as a host molecule for [60]fullerene.....	124

Chapter 4

Conclusions.....131

Summary.....133

References.....136
