

List of Graphs

Graph	Page no
1. Calibration curve for gallic acid	38
2. Calibration curve for quercetin	40
3. Calibration curve for naringenin	42
4. Calibration curve for PD1	66
5. Calibration curve for quercetin-3-glucoside	68
6. Calibration curve for BM1	69
7. Percentage restoration of various parameters by EE and AE against CCl ₄ -induced hepatotoxicity	97
8. Percentage restoration of various parameters by ME and AE against CCl ₄ -induced hepatotoxicity	97
9. Percentage restoration of various parameters by EE and EFEE against CCl ₄ -induced hepatotoxicity	105
10. Percentage restoration of various parameters by ME and MFME against CCl ₄ -induced hepatotoxicity	105
11. Percentage restoration of various parameters by EE and EFEE against paracetamol-induced hepatotoxicity	112
12. Percentage restoration of various parameters by ME and MFME against paracetamol-induced hepatotoxicity	112
13. Percentage restoration of various parameters by EE and EFEE against thioacetamide-induced hepatotoxicity	121
14. Percentage restoration of various parameters by ME and MFME against thioacetamide-induced hepatotoxicity	121
15. Percentage restoration of various parameters by AFEFEE and EFEFEE against CCl ₄ -induced hepatotoxicity	129
16. Percentage restoration of various parameters by EMKMFME and MFMFME against CCl ₄ -induced hepatotoxicity	129
17. Percentage restoration of various parameters by AFEFEE and	

EFEFEE against paracetamol-induced hepatotoxicity	138
18. Percentage restoration of various parameters by EMKMFME and MFMFME against paracetamol-induced hepatotoxicity	138
19. Percentage restoration of various parameters by AFEFEE and EFEFEE against thioacetamide-induced hepatotoxicity	144
20. Percentage restoration of various parameters by EMKMFME and MFMFME against thioacetamide-induced hepatotoxicity	144
21. Percentage restoration of various parameters by <i>P. daemia</i> against CCl ₄ -induced toxicity-in vitro	154
22. Percentage restoration of various parameters by <i>B. montanum</i> against CCl ₄ -induced hepatotoxicity in vitro	154
23. Percentage restoration of various parameters by <i>P. daemia</i> against paracetamol-induced hepatotoxicity in vitro	157
24. Percentage restoration of various parameters by <i>B. montanum</i> against paracetamol-induced hepatotoxicity in vitro	157
25. Percentage restoration of various parameters by <i>P. daemia</i> against thioacetamide-induced hepatotoxicity in vitro	160
26. Percentage restoration of various parameters by <i>B. montanum</i> against thioacetamide-induced hepatotoxicity in vitro	160
27. Percentage restoration of various parameters by PD1 and BM1 against CCl ₄ -induced toxicity in vitro	166
28. Percentage restoration of various parameters by PD1 and BM1 against paracetamol-induced toxicity in vitro	168
29. Percentage restoration of various parameters by PD1 and BM1 against thioacetamide-induced toxicity in vitro	170
