

## A C K N O W L E D G E M E N T

It gives me great pleasure to acknowledge the guidance, help and cooperation I have received from many persons during the preparation of this thesis. My heartfelt thanks are due to Prof. A. B. Darji who introduced me to the subject, guided, encouraged and made stylistic improvements throughout the course of the investigations undertaken and embodying them into the thesis. Perhaps this would not have been possible without his 'round the clock' supervision.

I express my sincere thanks to Dr. M.B. Sureshkumar for his valuable and continuous help during the experimental work and discussion of results. Thanks are also due to Dr. P.M.Shah and Dr. N.R.Shah for their cooperation. I owe my thanks to the staff of Central Workshop for their help. I am indebted to Mr. T.S. Patel and Mr. Chakraborty for computer data processing. Special thanks are due to Dr. Ravindran R. for going through the thesis in the final phase.

My thanks are due to Dr. H.K.Patel, Principal and Shri L. M. Anjaria, Head, Physics

Department of V. P. and R.P.T.P. Science College,  
Vallabh Vidyanagar for giving me permission and  
enough leave of absence to carry out my research  
work.

I am most grateful to Prof. S. K. Shah,  
Head of the Physics Department, M.S. University of  
Baroda, Baroda for providing excellent laboratory  
facilities.

Finally I am greatly indebted to my wife  
Kantaben, daughter Anjna, son Paresh and brother  
B.M.Patel for allowing me keep away from the social  
routine during the course of this work.

T. M. PATEL
