

List of figures

Figures	Page
2.1 Map of the Ganga basin. (a) the head water basin of the Ganga in the Himalaya (b) the Ganga basin, with its major tributaries in the Himalaya and the plains.	14
2.2 Monthly variation of (A) Rainfall (B) Mean air temperature at the different location in the Ganga basin.	19
2.3 Monthly variation of water discharge of the Ganga river at different locations along its course.	21
2.4 Precipitation over the Ganga drainage for the period January 1998 to May 2007.	22
2.5 Results of (a) repeat measurements (wt. %) of different elements in sediment samples (b) USGS rock standard W-1.	38
2.6 Variation of $^{87}\text{Sr}/^{86}\text{Sr}$ and $^{143}\text{Nd}/^{144}\text{Nd}$ measured with time in standards.	42
3.1 Sampling locations of sediments from the Ganga basin in its Himalayan drainage.	47
3.2 Sampling locations of sediments from the Ganga basin in plain	48
3.3 Scatter diagram of Sr, Al and Nd abundances in bulk sediment and their $<4\ \mu\text{m}$ fraction.	54
3.4 Scatter plots of CIA* in bank sediments with their $^{87}\text{Sr}/^{86}\text{Sr}$ and ϵ_{Nd} values and $^{87}\text{Sr}/^{86}\text{Sr}$ vs Rb/Sr and $^{87}\text{Sr}/^{86}\text{Sr}$ vs Al.	56
3.5 Two isotope system plot, $^{87}\text{Sr}/^{86}\text{Sr}$ and ϵ_{Nd} , in silicates of bulk sediments and their $<4\ \mu\text{m}$ fraction.	59
3.6 Funnel diagram of the Ganga mainstream and its tributaries along with $^{87}\text{Sr}/^{86}\text{Sr}$ and ϵ_{Nd} .	62
3.7 Downstream variations in $^{87}\text{Sr}/^{86}\text{Sr}$ values of silicates of the Ganga sediments.	67
3.8 Downstream variation in ϵ_{Nd} of the Ganga mainstream sediments.	68

3.9	Physical erosion rates in the Ganga-Brahmaputra-Indus basins as a function of run off.	76
3.10	Elevation (gray line) and relief (black line) profiles of selected rivers of the Ganga basin	78
3.11	Locations of hotspots of physical erosion over the southern Himalaya	79
4.1	$^{87}\text{Sr}/^{86}\text{Sr}$ vs $1/\text{Sr}$ plot of the G-B and global rivers.	84
4.2	Interannual variation in TDS of the Ganga river and its tributaries.	89
4.3	Ternary plots of major cations (a) and anions (b) in the Ganga head waters, mainstream and tributaries.	90
4.4	Comparison of Ca, Mg and Na abundances in Ganga mainstream measured in this study with those reported for the sample collected during 1982/83 from the same locations.	91
4.5	Scatter plot of (Ca+Mg) and (Alkalinity + SO_4).	93
4.6	Arial distribution of salt affected (usar) soils in different parts of Uttar Pradesh	96
4.7	Variation of Na and Ca concentrations of the Ganga mainstream from its source to its outflow.	101
4.8	Variation of Na with Cl of the Ganga mainstream.	101
4.9	Variation of Ca/Mg and Mg with Ca in the Ganga river and its tributaries.	102
4.10	Plot between Ca/Mg and Calcium saturation Index (CSI) of water samples from the Ganga and its tributaries	102
4.11	Erosion rates (atmospheric corrected) Na^* , Ca^* , Mg^* , and Sr in the various sub-basins of the Ganga.	110
4.12	Chemical Erosion rates of cations, $(\text{CER})_{\text{cat}}$, in the various sub-basins of the Ganga	111
4.13	Variation of Sr with Na in the Ganga mainstream.	121
4.14	(a) $^{87}\text{Sr}/^{86}\text{Sr}$ and Ca/Sr in river waters and precipitated carbonates (b) $^{87}\text{Sr}/^{86}\text{Sr}$ of the Ganga water and silicate	125

	component of bed sediments	
4.15	Temporal variation of major ions and Sr in the Yamuna and Ganga River (at Allahabad after confluence with the Yamuna)	133
4.16	Variation of elements with Discharge of the Ganga river at Allahabad after the confluence	134
4.17	Temporal variation of dissolved elements (corrected for atmospheric input) in the Ganga River at Allahabad	135
4.18	Time series (Sep.2004-Sep.2005) variation of Ca/Sr and $^{87}\text{Sr}/^{86}\text{Sr}$ in the Yamuna and Ganga River (at Allahabad)	137
5.1	Scatter plots of Na, K, Fe, Ca_{sil} , and Mg_{sil} wt (%) and Sr_{sil} (ppm) abundances vs Al (wt %) in bank sediments, suspended load and $<4\mu\text{m}$ of bank sediments	148
5.2	Element/Al ratios in bank and suspended sediments	150
5.3	Frequency distribution of (element/Al) ratios in the Ganga sediments. Ca_{sil} is silicate derived Ca	151
5.4	Scatter diagram of coulometer measured (IC) vs calculated (IC) _L based on Ca and Mg in mild acid leach.	153
5.5	Variation of IC along the Ganga mainstream from its source to out flow.	153
5.6	Scatter plots of Ca/Al and Mg/Al with (IC/Al) in the Ganga bank and suspended sediments (All in wt%).	160
5.7	Temporal variation of suspended load (mg l^{-1}) and organic carbon content (wt%) in the Ganga mainstream at Allahabad	163
5.8	Variation of C_{org} with Al in different components of the Ganga river sediments	164
