

List of Tables

2.1	Various stromatolites/fossils findings and probable ages of various formations	15
2.2	Lithology of drainage basins of major rivers of the G-G-I source waters	21
2.3	Re, Os abundances and $^{187}\text{Os}/^{186}\text{Os}$ in some geological and environmental samples	28
2.4	Inter-comparison of Re measurements	36
2.5	Re concentration in samples ashed at different temperatures	36
2.6	Mass spectrometric settings for Re & Os measurements	37
2.7	Os isotopic composition of standard over one year time period	39
2.8	Procedural blanks of Re and Os	40
2.9	Os & Re concentration and $^{187}\text{Os}/^{186}\text{Os}$ ratio in New Albany black shales: Inter laboratory comparison	41
2.10	Results of Re, Os and $^{187}\text{Os}/^{186}\text{Os}$ repeat measurements	41
2.11	Results of AAS measurements of USGS standard, W-1	44
2.12	Replicate measurements of different elements in black shales using AAS	45
2.13	Coefficients of variation for different elements for AAS measurements	45
2.14	Replicate analyses of phosphorus in black shales using spectrophotometer	48
2.15	Silica concentration in river waters measured by spectrophotometer and ICP-AES	49
2.16	Replicate measurements of total carbon and inorganic carbon in black shales	50
3.1	Chemical and mineralogical composition of carbonate rocks from the Lesser Himalaya	56
3.2	Sr, O & C isotopic data on carbonate rocks from the Lesser Himalaya	67
3.3	Mean compositions of carbonate rocks from the Lesser Himalaya	68
3.4	Range in Sr abundance and $^{87}\text{Sr}/^{86}\text{Sr}$ in carbonates from the Lesser Himalaya	68

3.5	Major ion and Sr concentrations and $^{87}\text{Sr}/^{86}\text{Sr}$ in G-G-I source waters	75
3.6	Primary sources of major elements and Sr to river waters	77
3.7	Elemental abundance ratios in the HH and LH granites/gneisses and metasediments	80
3.8	Elemental concentrations and ratios in bed rocks and soil profiles	83
3.9	Silicate weathering contribution of cations to G-G-I source waters	86
3.10	Seasonal variation in (ΣCat)s in the Ganga source waters	89
3.11	Silicate and carbonate weathering contribution of Sr to G-G-I source waters	98
3.12	Silicate and carbonate weathering rates	103
4.1	Re, Os abundances and Os isotopic composition of black shale outcrops from the Lesser Himalaya	110
4.2	Re, Os and $^{187}\text{Os}/^{186}\text{Os}$ in black shales from the Maldeota and Durmala Mines	111
4.3	Major and minor elements data of black shales	114
4.4	Present day Os fluxes and isotopic ratios	132
