

# **ACKNOWLEDGEMENT**

It is indeed an honor for me express my deep sense of gratitude and sincere thanks to all those who have helped me in every possible way to accomplish my long-cherished dream of pursuing a doctoral research work.

I feel privileged in expressing my gratitude and indebtedness to my guide **Dr. (Mrs.) Sandhya Kiran Garge**, Professor and Head, Department of Botany, The M.S. University, for her guidance, motivation and valuable suggestions that have been helpful in building a scientific temperament in me. Her words of encouragement and motivation helped me sail through all the ups and downs of life without losing the focus of my research work. Her dedication towards her students with all her motherly care is something beyond the words to describe. I am fortunate to have her as my mentor and guide. Without her support I would not have been able move ahead in this academic journey and pursue my dreams.

I also express my sincere thanks to **Dr. Ajai**, Distinguished Scientist, Space Application Centre (ISRO), for motivating me to pursue my research work. His suggestions and guidance have been the source of inspiration for me to move ahead with my research work.

I was fortunate to have the privilege of working with **Dr. Mini Raman**, Head, Marine Biology Group, Space Application Centre (ISRO), who not only taught me the basics of Marine Biology and but also helped me at every step of my research work. She was instrumental in me helping me learn the art of data analysis. I express my deepest gratitude to her for her patience, encouragement and valuable guidance, which has helped me sail through this academic.

I am indebted to the faculty members of Department of Botany, The M. S. University, especially to **Dr. Aruna Joshi**, for their guidance and mentorship during the Ph.D. course work.

I am also thankful to my friends in RS-GIS Lab, namely, **Ms. Ramandeep Kaur Malhi**, **Ms. Alpana Revdandekar**, **Ms. Usha Joshi** and **Ms. Ashwini Mudalier** and other research colleagues and friends, for their kind cooperation and motivation.

I wish to express my special thanks to all my friends **Dr. Meghal Shah**, **Dr. Disha Lal Shrivastava**, **Dr. Madhumita Tripathy**, **Dr. Rajeshwary Chauhan**, **Mr. Rahul Ranjan**, **Ms. Dimple Sanghvi**, **Ms. Rupal Barhambhatt** with whom I worked at Space Application Centre (ISRO). I am indebted to them for their constant support, not just academically but also personally. The fun-filled days at SAC, amidst these happy-go lucky friends, never allowed me to get tired of my work. They have always been there whenever I was in need.

I am thankful to **Mr. Dilip Surkar**, Director, Vikarm A Sarabhai Community Science Centre, for encouraging me in my academic endeavor. His support and guidance have been invaluable.

I would also like to thank my family especially my father- in-law, **Dr. Ashok Kandya**, and my mother-in-law, **Mrs. Shiksha Kandya**, for all their support and blessings

I would not have been able to pursue my dream, without the encouragement and support of my husband **Dr. Anurag Kandya**. I am blessed to have him as my life partner, who not only makes the days enjoyable but also meaningful. His meticulous way of working inspires me to go an extra mile to achieve the goals. His words of encouragement and positive outlook help me sail through all the tough times in life.

My academic journey would not have happened without the support of my elder brothers **Mr. Neeraj Nandkeolyar** and **Mr. Nikhil Nandkeolyar**. I am blessed to have these two shields of my life. I am indebted to them for being my biggest supporters in every endeavor of mine.

I would like to express my deepest gratitude to my parents who not only gave birth to me but were also my inspiration and my best friends, my mother **Late Mrs. Nirmala Nandkeolyar** and my father **Late Mr. Nand Nandan Nandkeolyar**. It was their wish to see me with a doctorate degree, but their untimely demise has left a permanent vacuum in my life. I was privileged to have them as my parents, with all their unconditional love and support. I dedicate this thesis to them, with a hope that somewhere far from the sky they would be happy seeing me fulfill their dreams.

Last but the most important acknowledgment is for my seven-month-old little bundle of joy **Ms. Anaira Kandya**, who has not only added a new dimension to my life but whose smile has been the main motivation factor that helps me sail through all the turbulences of life. Just the thought of making her feel proud of me keeps me going ahead. Thanks Mishti!
