

ACKNOWLEDGMENTS

The author would like to express his deep sense of gratitude to Dr. L.S. Chamyal for his guidance and constant encouragement. Without his kind help and supervision, it would not have been possible for the author to complete this work.

He is grateful to Prof. M.P. Patel, Head of the Geology Department for providing departmental facilities and enthusiastic support.

He is deeply indebted to Prof. S.S. Merh for his continuous encouragement, help, valuable guidance and above all the right inspiration that he received from him at all stages of his research work.

The author is grateful to Prof. A.K. Singhvi and Shri Navin Juyal of Physical Research Laboratory, Ahmedabad for allowing to use the tentative Luminescence dates and for useful discussions. He is also thankful to Prof. S.K. Tandon, University of Delhi, Prof. B. Parkash, Roorkee University, Prof. S.N. Rajaguru, Pune, Dr. R.K. Pant, Dehradun, Prof. I.B. Singh, Lucknow University Prof. Thomas Rockwell, San Diego State University, USA and Prof. Nigel Woodcock, Cambridge University, UK for their useful discussions and valuable suggestions at various stages of his work.

The author is thankful to Shri Aniruddha Khadkikar for his valuable discussions and help at all stages of the preparation of this thesis.

The author would always remember the help provided his friends and colleagues, Dr. V. Sridhar, Shri D.M. Maurya, Ms. Rachna Raj, Shri Manish Mamtani, Shri George Matthew and Shri Parag Sohoni.

The author also expresses the all-round help provided in various ways by all the staff members and research scholars of the Geology Department.

This acknowledgment would be incomplete without placing on record the continuous assistance provided by Shri N.D. Vankar, both in the field as well as in the laboratory.

Lastly, the author would be failing in his duty if he does not express his most affectionate appreciation to the emotional support provided by his parents, brothers and especially his wife Arjuman.

Javed N. Malik
