

CONTENTS

PART-I

LIQUID CRYSTALS AND LIQUID CRYSTALLINE POLYMERS

	Page
1. INTRODUCTION	1-53
1. Liquid Crystals	2
2. Liquid Crystalline Polymers	28
2. AIMS AND OBJECTIVES	54-55
3. EXPERIMENTAL	56-114
1. Preparation of Compounds.	57
2. Mesogenic Polymers.	66
3. Characterization of Liquid Crystals and Liquid Crystalline Polymers.	73
4. RESULTS AND DISCUSSION	115-172
1. Homologous series with one or two Amido central linkages.	116
2. Mesogens with positive Dielectric Anisotropy.	139
3. Discotic Compounds.	145
4. Polyesters from 3,3'-dimethoxy-4,4'- dihydroxy benzalazine.	157
5. Polyesters with Naphthalene nucleus.	162
6. Textures of liquid crystalline materials.	168
5. REFERENCES	173-206

PART - II

LIQUID CRYSTALS AND LIQUID CRYSTALLINE POLYMERS AS
STATIONARY PHASES IN GAS CHROMATOGRAPHY

	Page
II.1 INTRODUCTION	208-245
II.1' AIMS AND OBJECTIVES	246-247
II.2 EXPERIMENTAL	248-256
(A) Preparation of stationary phase.	249
(B) Column	250
(C) Apparatus	251
(D) Solute	252
(E) Procedure	252
II.3 RESULTS AND DISCUSSION	257-301
(i) Solid support, % Loading and Probe solutes.	259
(ii) Inverse gas chromatographic studies.	260
(iii) Retention behaviour and thermodynamic parameters.	274
(iv) Analytical applications.	294
II.4 REFERENCES	302-312
SUMMARY	313-324
PUBLICATIONS	325- 326
