

LIST OF FIGURES

Figure No	Title	Page No
1.1	β cell dysfunction and insulin resistance in the pathogenesis of T2DM	7
2.1	Prevalence of type 2 diabetes in different parts of India	27
2.2	Glucose homeostasis: roles of insulin and glucagon	30
2.3	Insulin resistance and β cell dysfunction are core defects of type 2 diabetes	33
2.4	Islet β cell failure and the natural history of T2D	34
2.5	How do insulin resistance and β -cell dysfunction combine to cause type 2 diabetes?	35
2.6	Loss of β -cell function occurs before diagnosis	36
2.7	Hypothetical scheme: relation of altered metabolism of triglyceride-rich lipoproteins to the development of an atherogenic lipoprotein phenotype	38
2.8	Characteristics of Asian Indian phenotype	42
2.9	Adverse effects of excess adipose tissue	45
2.10	Primary causes of kidney failure (2005)	48
2.11	Screening for microalbuminuria	53
2.12	Prevention strategies: high risk versus population strategy	68
3.1	Experimental design for phase I	102
3.2	Experimental design for phase II	105
3.3	Product development & sensory evaluation	110
3.4	Impact of BGP supplementation (study design)	113
4.1	Prevalence of overweight and obesity in T2DM subjects based on Asia Pacific classification	125
4.2	Percent prevalence of abdominal obesity based on IDF criteria	127
4.3	Distribution of energy coming from macronutrients	132
4.4	Frequency distribution of HbA1C in T2DM subjects	134
4.5	Prevalence of microalbuminuria in T2DM subjects	141
4.6	Risk factor scenario in T2DM subjects	142
4.7	Correlation: FBG vs microalbumin	164
4.8	Correlation: HbA1C vs microalbumin	164
4.9	Multiple risk factor scenario in the industrial T2DM subjects	184
4.10	Mean total scores of the four recipes	201
4.11	Impact of BGP supplementation on the FBG levels of the experimental T2DM subjects	214
4.12	Impact of BGP supplementation on the HbA1C levels of the experimental T2DM subjects	214
4.13	Impact of BGP supplementation on the FBG levels of the experimental group subjects based on their initial FBG levels	216

Figure No	Title	Page No
4.14	Impact of BGP supplementation on the HbA1C levels of the experimental group subjects based on their initial FBG levels	216
4.15	Pre and post frequency distribution curves of FBG	238
4.16	Pre and post frequency distribution curves of HbA1C	238
4.17	Pre and post frequency distribution curves of TC	238
4.18	Pre and post frequency distribution curves of TG	238
4.19	Summary of salient observations-BGP impact study	250
5.1	Stages in the preparation of barley grass powder and capsules	264
