

### ACKNOWLEDGMENTS

I take great pleasure in recording my sincere thanks to Prof. L. J. Parekh, for his advice, help, guidance and the unrestricted freedom given throughout the course of work.

I also take this opportunity to thank Prof. Bjorn Lindqvist, Division of Cellular and Molecular Biology, University of Oslo, Oslo, Norway, for providing me an opportunity to work in his laboratory and exposing me to the frontiers of Molecular Biology.

I thank Prof. C. J. Knowles, Biological Laboratory, University of Kent, Canterbury, Kent, U. K., for his constructive criticism of my work. The discussions with him were extremely helpful in designing appropriate experiments.

I should not forget to thank Dr. G. Nareshkumar for making this thesis more readable and Mr. Gnyaneshwar Prasad for the help he extended during the preparation of the thesis.

I thank all my colleagues in the laboratory, friends including the M. Sc. students, working with them was a great pleasure. I also thank all the teachers of the department for helping me whenever needed.

I thank Mr. Wilfred Pinto for helping me to type this thesis.

I am thankful to The Department of Environment (DOE), Government of India, for the financial assistance provided.

(K. NARAYANASAMY)
