

### LIST OF FIGURES

<u>FIGURE NO.</u>	<u>TITLE</u>	<u>PAGE NO.</u>
1.	Annual deaths of children under five years by main causes	2
2.	Lives saved by immunisation	5
3.	Immunisation revolution, 1980 & 1988	6
4.	Measles immunisation coverage, 1987 & 1988	12
5.	Passage history of Edmonston vaccine strain and of vaccines derived from Edmonston A & B lines	37
6.	A syringe/vial design for use in delivery of live virus vaccine (Ezeject [R])	42
7.	City map of Vadodara showing the slum areas in the epidemiological study	84
8.	Incidence of post-measles complications as per nutritional status in various age groups observed at follow up in children (0-6) years	121
9.	Correlation between maternal and cord blood measles HAI antibody titres (GMT)	129
10.	Fall in passive measles HAI antibody titres (GMT) in various age groups (0-72 months)	143
11.	Fall in passive measles HAI antibody seropositivity in various age groups (0-72 months)	144
12.	Seroconversion rates according to prevaccination measles HAI antibody titres and age at vaccination in children (6-72 months)	168
13.	Postvaccination rise in measles HAI antibody titres (GMT) in children (6 - 72 months) who seroconverted (four-fold (rise)	169
