

|              | <b>List of Figures</b>  | <b>Page</b> |
|--------------|---|-------------|
| Fig 3.1      | Calibration curve for estimation of Galactose.                              | 54          |
| Fig 3.2      | Apparatus for determination of methoxy content.                             |             |
| Fig 3.3      | Calibration curve for estimation of CPM.                                    | 56          |
| Fig 3.4      | Calibration curve for estimation of DIL.                                    | 57          |
| Fig 3.5      | Calibration curve for estimation of PPA.                                    | 58          |
| Fig 3.6      | Calibration curve for estimation of PPA in Urine.                           | 61          |
| Fig 4.1      | Flow diagram of procedure for Hydrolysis of GG.                             | 65          |
| Fig 4.2      | Flow diagram of procedure for Methylation of GG.                            | 67          |
| Fig 4.3      | Flow diagram of procedure for Oxidation of GG.                              | 69          |
| Fig 4.4      | Flow diagram of procedure for preparation of Sodium<br>carboxy methyl guar. | 71          |
| Fig 4.5      | I.R. Spectra of GG and MGG.   | 77          |
| Fig 4.6      | DSC thermograms of GG and MGG.  | 79          |
| Fig 4.7      | DSC thermograms of NaCMG.   | 84          |
| Fig 5.1      | Gel Strength measurement apparatus.   | 93          |
| Fig 5.2.1    | Schematic diagram of swelling of matrix tablets                             | 102         |
| Fig 5.2.2    | Comparative swelling of GG and HPMC matrix tablets.                         | 103         |
| Fig 5.3      | Reduction in weight of matrix tablets after dissolution at<br>time.         | 105         |
| Fig 5.4.1    | Effect of concentration of GG on release of CPM.                            | 108         |
| Fig 5.4.2A   | Effect of hydrolysis of GG on release of CPM.                               | 111         |
| Fig 5.4.2B   | Effect of hydrolysis of GG on release of DIL.                               | 113         |
| Fig 5.4.3A   | Effect of methylation of GG on release of CPM.                              | 115         |
| Fig 5.4.3B   | Effect of methylation of GG on release of DIL.                              | 117         |
| Fig 5.4.4.1A | Effect of diluents on release of CPM from GG matrices.                      | 120         |
| Fig 5.4.4.1B | Effect of diluents on release of DIL from GG matrices.                      | 122         |
| Fig 5.4.4.2A | Effect of diluents on release of CPM from HGG matrices.                     | 124         |

|              |   |       |
|--------------|---|-------|
| Fig 5.4.4.2B | Effect of diluents on release of DIL from HGG matrices.                     | 126   |
| Fig 5.4.4.3A | Effect of diluents on release of CPM from MGG matrices.                     | 128   |
| Fig 5.4.4.3B | Effect of diluents on release of DIL from MGG matrices.                     | 130   |
| Fig 5.4.5A   | Effect of method of preparation on release of CPM from GG/HGG/MGG matrices. | 133   |
| Fig 5.4.5B   | Effect of method of preparation on release of DIL from GG/HGG/MGG matrices. | 135   |
| Fig 5.4.6.1A | Effect of pH of dissolution medium on release of CPM from GG matrices.      | 138   |
| Fig 5.4.6.1B | Effect of pH of dissolution medium on release of DIL from GG matrices.      | 140   |
| Fig 5.4.6.2A | Effect of pH of dissolution medium on release of CPM from HGG matrices.     | 142   |
| Fig 5.4.6.2B | Effect of pH of dissolution medium on release of DIL from HGG matrices.     | 144   |
| Fig 5.4.6.3A | Effect of pH of dissolution medium on release of CPM from MGG matrices.     | 146   |
| Fig 5.4.6.3B | Effect of pH of dissolution medium on release of DIL from MGG matrices.     | 148   |
| Fig 5.5.1    | Drug release profile form matrix tablets of PPA.                            | 152   |
| Fig 5.5.2    | Urinary excretion data of PPA matrix tablets                                | 154   |
| Fig 6.1      | Water uptake measurements apparatus.  | 159   |
| Fig 6.2      | Swelling characteristics of GG/OGGs.  | 163   |
| Fig 6.3      | Scanning electron microphotographs of tablet surface.                       | 163-A |
| Fig 7.1      | DSC thermograms of NaCMG with plasticizers.                                 | 180   |
