

List of Tables

Table 1.1: Source of type strains of <i>Deinococcus</i> species isolated till date.	4
Table 1.2 Comparative account of radiation resistance in bacteria	8
Table 1.3: Role of major proteins involved in recombinational repair in <i>D. radiodurans</i> R1	16
Table 1.4: Mn ²⁺ dependent pathways in bacteria	25
Table 2.1 Bacterial strains used in this study.....	33
Table 2.2 PCR primers used in this study.....	36
Table 2.3: Specificity of the conserved regions of the aligned 16S rRNA genes of <i>Deinococcus</i> sp.	40
Table 2.4: Physico-chemical analysis of the soil samples	45
Table 2.5: Diversity indices for deinococcal community from different soil samples	50
Table 2.6: Sequence similarity of representative bands excised from the DGGE gel shown in Fig. 2.8.....	51
Table 2.7: Characterization of gamma radiation enriched colonies for UV resistance and PCR with <i>Deinococcus</i> specific hemi-nested protocol	52
Table 2.8: 16S rRNA gene sequence match of the radiation resistant isolates.....	54
Table 2.9 Morphological and biochemical characteristics of the radiation resistant bacterial isolates.....	54
Table 2.10: Carbohydrate utilisation of the radiation resistant bacterial isolates	55
Table 2.11: Antibiotic susceptibility of the radiation resistant bacterial isolates	57
Table 3.1 Bacterial strains and plasmids used in the study.....	65
Table 3.2 Comparative heavy metal resistance of radiation resistant bacteria, <i>E.coli</i> and <i>P.putida</i>	75
Table 4.1 Strains and Plasmids used in this study	105
Table 4.2 Metal binding proteins and peptides and their effect on Cd ²⁺ accumulation	120
