

## LIST OF FIGURES

No.	Title	Page
1.1	Location Map of Study Area	4
1.2	Communication Map of Study Area	6
2.1	Geological Map of Study Area (Compiled after G.S.I. and Pareek, 1981)	31
3.1	Quaternary Lithostratigraphy in a. Southwestern Thar and b. Northeastern margin of Thar (after Wadhawan, 1988)	48
3.2 a-f	Typical Aeolian Sections of the Upper Luni and Kantli Blocks	55
3.2 g	Composite Stratigraphic Section of dunal material at Budha Pushkar	56
3.3	Deep Section of the 16R dune at Didwana (after Misra and Rajaguru, 1986)	57
3.4	Alluvial Section at Silari (Dhir <i>et al.</i> , 1994)	60
3.5	Geological Section across Kantli River at Chanora (based on C.G.W.B. bore hole data)	63
3.6	Geological Section across Kantli River at Jodhpura (based on C.G.W.B bore hole data)	64
3.7	Fence Diagram depicting distribution pattern of lacustrine sediments in Sambhar lake at Sambhar (after GMICC, 1986)	68
3.8	Fence Diagram depicting distribution pattern of lacustrine sediments in Sambhar lake at Nawa (after GMICC, 1986)	69
3.9	Fence Diagram depicting distribution pattern of lacustrine sediments in Kuchaman lake (based on Rai and Sinha, 1990)	70
3.10	Stratigraphy, lake water level curve, summary of lacustrine history and related climatic changes at Didwana (after Wasson <i>et al.</i> , 1983 and Singh <i>et al.</i> , 1990)	71
4.1	Tectonic Framework of Northwestern India (after Eremenko <i>et al.</i> , 1969 and Biswas, 1987)	76
4.2	Significant lineaments of Northwestern India (after Bakliwal <i>et al.</i> , 1987)	85
4.3	Lineament Fabric of Upper Luni and Kantli River basins	95
5.1	Geomorphological Map of the Upper Luni and Kantli Blocks	106
5.2	Classification of Basic Dune Types (after Thomas, 1989)	113

5.3	Areal distribution of Dune Types in the Upper Luni and Kantli Blocks	114
6.1	Neotectonic Signatures in the Upper Luni and Kantli basins	127
6.2	Neotectonic Signatures in the Upper Luni Block	128
6.3	Neotectonic Signatures in the Sambhar-Kantli Block	129
6.4	Geological Cross Section along Nokha Jodhan-Daulatpura-Nawa (based on CGWB bore hole data)	132
6.2.1	Geological Section along Kasnau-Merta-Barr (based on CGWB bore hole data)	137
6.2.2	Geological Section across Luni River along Ransigaon-Thakurwas-Barr (based on CGWB bore hole data)	138
6.2.3	Geological Section along Luni Channel (Jhak-Kalu-Badauli) (based on CGWB bore hole data)	140
6.3.1	Geological Cross Section along Talai ki Dhani-Losal-Nawa (based on CGWB bore hole data)	141
6.3.2	Geological Cross Section along Fatehpur-Patoda-Losal (based on CGWB bore hole data)	141
6.3.3	Geological Cross Section along Dighal-Gungara-Palsana-Bai (based on CGWB bore hole data)	143
6.3.4	Geological Cross Section along Chirawa-Jodhpura-Trilokpura (based on CGWB bore hole data)	144
6.3.5	Geological Cross Section along Danta Ramgarh-Gauti-Ghuwala (based on CGWB bore hole data)	145
7.1	Present day Drainage System	148
7.2	Longitudinal Profiles of Luni and Kantli Rivers and their lithotectonic significance	150
7.3	Palaeodrainage configuration of Proto-Luni Drainage System	157
7.4	Regional Palaeodrainage configuration of Northwestern India	164
8.1	Land-sea Configuration during Archaean-Early Proterozoic	173
8.2	Creation of Aravalli basin due to rifting of B.G.C. Proto-continent (Early Proterozoic)	173
8.3	Upliftment and Mountain Building of Aravalli Mountain Belt (Early-Middle Proterozoic)	174
8.4	Rifting of Aravalli-B.G.C. Proto-continent and creation of Delhi Basin (Middle Proterozoic)	174

8.5	Upliftment and Mountain Building of Delhi Mountain Chain, Erinpura Granite Emplacement and creation of Vindhyan basin (Middle-Late Proterozoic)	176
8.6	Deposition of Marwar Supergroup of rocks. Shrinking of Proto-Tethys into Krol Basin (Cambrian)	176
8.7	Himalayan Orogeny (Post Kirthar), Tertiary Transgression, Creation of Himalayan Foredeep zone (Eocene-Middle Miocene)	179
8.8	Regression, Emergence of Bikaner-Palana Tertiary Formations, Thrusting of Aravallis and Vindhyan (Neogene)	179
8.9	Reactivation of Great Himalayan Thrust (MBT), Rise of Siwalik Range (Siwalik Orogeny), Formation of Indo-Gangetic basin and sedimentation; Creation of Sambhar basin, Development of Proto-Luni drainage system (Early to Middle Pleistocene)	180
8.10	Development of series of NW-SE Fault System, northwesterly tilt of Aravalli/Delhi Mountain chain plunging northeast, Proto-Luni drainage disruption-migration, carving of separate Yamuna channel, Dhrishdavati, Ghaggar, etc. Desiccation, increase in Aridity, Dune Building Activity (Late-Middle-Late Pleistocene)	180
8.11	Progressive rotational tilt of the Aravalli Mountain Chain, Local uplifts, carving of Kantli, Mendha, Chandrawati and Sabi river channels, active dune building process and present day landscape (Holocene-Recent)	183
9.1	Seasonal variation in groundwater levels (Pre-monsoon and Post-monsoon) (Average of 1978-1988 period)	190
9.2	Secular variation in groundwater levels Post-monsoon (1978 & 1992)	191
9.3 a-e	Hydrographs of National Network Observation Wells in the Upper Luni River Basin	193
9.4	Hydrographs of National Network Observation Wells in the Kantli River Basin	198
9.5	Fence Diagram of the Kantli Block	205
9.6	Fence Diagram of the Central Parts of Study Area Adjacent to Sambhar Lake	206
9.7	Fence Diagram of the Upper Luni Block	207
10.1	Iso T.D.S. Contour Map of the Upper Luni and Kantli Blocks	216
10.2	Iso Chloride Contour Map of the Upper Luni and Kantli Blocks	219
10.3	Piper's Diagram showing the Chemical Quality of Groundwater in the Upper Luni River Basin	221
10.4	Piper's Diagram showing the Chemical Quality of Groundwater in the Kantli River Basin	222

10.5	US Salinity Diagram for the classification of groundwater in the Upper Luni River Basin for Irrigation Purpose	226
10.6	US Salinity Diagram for the classification of groundwater in the Kantli River Basin for Irrigation Purpose	227
10.7	Distribution of Fluoride Content in the Upper Luni and Kantli Blocks	231
11.1	Hydrogeological Categorisation of the Upper Luni and Kantli Blocks	244
11.2	Geohydrological Map of the Upper Luni and Kantli River Blocks	245
12.1	Schematic diagram of Dugwell with radial bores	250
12.2	Schematic diagram of Handpump built under appropriate subsurface conditions	251
12.3	Schematic diagram of Bore well	252
12.4	Schematic diagram of Village Pond	254
12.5	Schematic diagram of Storage Tank	255
12.6	Schematic diagram of a Joda Nal in a dunal terrain	256
12.7	Schematic diagram of Modified form of typical Excavated Tank and variations (after Burton, 1965)	257
12.8	Schematic diagram of Tanka (Cistern)	258
12.9	Schematic diagram of Percolation Tank	260
12.10	Schematic diagram of Check Dam	262
12.11	Schematic diagram of Gully Plug	263
12.12	Schematic diagram of Subsurface Dam	264
12.13	Schematic diagram of Contour Trenching and Bunding	265
