

LIST OF TABLES

2.1	Line parameters of Six-Phase line for validation of expressions	43
2.2	Comparative values of line parameters and certain characteristics of 400 KV phase-phase Double Circuit Transmission System and Six-Phase transmission systems	49
2.3	Comparative Statement of TPDCS and Six-Phase Design	50
3.1	Values of Submatrices for Different Transformers	61
3.2	Connection Table for Wye/Star Transformer, with Equivalent Circuit	61
3.3	Computation of certain equivalent impedance matrices (With wye/star terminal transformers)	73
6.1	Connection table for Wye / Star transformer with equivalent windings P,S & T characterized by $\alpha = (1 + tp)$, $\beta = 1$, $\gamma = -1$	122
6.2	Circuit Characteristics With 100 MVA Base	133
6.3	A.C. Load Flow Data	133
6.4	A.C. Load Flow Data for Increased System Loading	134
6.5	Voltage Magnitude & Phase Angles	134
6.6	Line Flows and Transmission Efficiencies	135
