

ACKNOWLEDGEMENT

It is with great pleasure that the author acknowledges her deep sense of gratitude to Dr. A.M. Talati, Ex-Professor and Head, Applied Chemistry Department, for suggesting the problem and stimulating interest in the work, and for encouragement and guidance through the various phases of the work.

She also takes this opportunity to express her sense of gratefulness to Prof. S.B. Pandya, Dean, Faculty of Technology and Engineering, for his encouragement and taking interest in the work.

Her thanks are due to Prof. J.M. Lohar, Head, Applied Chemistry Department, for providing the facilities for her work and for encouragement during the course of the research work.

She also expresses her sincere thanks to her colleagues V.J. Dhimar, S.K. Mehta, B.N. Narkhede, R.N. Trivedi, and Y.K. Joshi, for their valuable help willingly rendered from time to time during the course of this investigation.

She thanks all her fellow workers and members of staff of Applied Chemistry Department for their kind cooperation.

Thanks are also due to Shri K. Mohanchand for excellent typing work and for very good cooperation in completing the work as expected.

Further, she is indebted to U.G.C. for the award of research fellowship to carry out this work.

Finally, the author takes proud privilege to express her gratitude to her parents, husband, in-laws and other family members without whose help and inspiration this work would have remained incomplete.

D.S. Chaudhari
