

ACKNOWLEDGEMENTS

I wish to express my deepest gratitude to Prof. H. L. Bhalla, Professor of Pharmaceutics, and Founder Director of the B. V. Patel PERD Centre. He has been a constant source of guidance and inspiration to me and this dissertation is a result of his rational and meaningful thinking.

I would like to thank Dr. (Ms) Anisha Pargal, Director, B. V. Patel PERD Centre, for the useful suggestions, for providing excellent research facilities and also for always keeping the scientific temperament alive in all of us.

I am extremely grateful to the Department of Atomic Energy, Government of India for granting me a scholarship.

I would like to thank Dr. V.P. Shedbalkar for his help in the analytical work, Dr. Shubha Rani for her help in statistical calculations and Dr. Bakulesh Khamar, for his help in the *in vivo* studies.

I also wish to express my gratitude to Cadila Laboratories Ltd. for not only generously providing gift samples of drugs and additives, but also for permitting us to use their excellent library facility.

My colleagues and staff of the B. V. Patel PERD Centre have always been very helpful and co-operative and I take this opportunity to thank them too.

My sincerest thanks are also due to my maternal uncles, with whom I stayed during the tenure of my research work and for having cared for me so well.

My parents, brother and sister-in-law have been a constant source of inspiration and they have been very kind in taking up the additional burden of my duties, during this tenure.
