

INDEX

1. INTRODUCTION	1
2. NOTATIONS	7

Chapter Number	Contents	Page No.
-------------------	----------	----------

Part I

MULTICOLLINEARITY OF MEANS	10
----------------------------	----

1. ON CONDITIONS FOR THE FORMS OF THE TYPE: $XAX' + (LX' + XL')/2 + C$ TO BE DISTRIBUTED INDEPENDENTLY OR TO OBEY WISHART DISTRIBUTION, WITH APPLICATIONS.	10
1.1 Introduction and summary	10
1.2 Conditions that $XAX' + (LX' + XL')/2 + C$ is distributed as Wishart	11
1.3 Conditions for the independence of $XAX' + (LX' + XL')/2 + C$ and $XBX' + (MX' + XM')/2 + N$	15
1.4 Conditions that number of forms: $(X+L)A(X+L)'$ are independently distributed as Wishart	18
1.5 Applications	20
1.6 Invariance of the test criteria given in (1.5)	25
1.7 Remarks	28

2.	DISTRIBUTIONS CONCERNING THE TEST PROCEDURES FOR MULTICOLLINEARITY OF MEANS	30
2.1	Introduction and summary	30
2.2	Distributions of the statistics defined in (2.1.1)	31
2.3	Power-distribution of g_1 or g_2 or λ_p for the particular case when $r=1$	39
2.4	Mutual independence of certain statistics under null hypothesis	41
2.5	A numerical example to illustrate the technique of computation	46
3.	MONOTONIC LOWER BOUND ON THE POWER FUNCTION REGARDING THE TEST PROCEDURES FOR MULTICOLLI- NEARITY OF MEANS	54
3.1	Introduction	54
3.2	Monotonicity of the test when $r=1$	54
3.3	Monotonicity for the $\lambda_{\max}$ test in general	56
4.	SIMULTANEOUS CONFIDENCE BOUNDS ON THE REGRESSION LIKE PARAMETERS AND DEPARTURES FROM MULTICOLLI- NEARITY OF MEANS	65
4.1	Introduction	65
4.2	Simultaneous Confidence bounds on the regression like parameters	66

4.3 Simultaneous Confidence bounds on ξ_i 's (Multicollinearity of means of first kind)	69
4.4 Simultaneous confidence bounds on the departures of means of the Multicollini- nearity of means ^{of} second kind	74
4.5 Simultaneous confidence bounds on ($\xi_i - \bar{\xi}$)'s	79
4.6 Simultaneous confidence bounds on ($\xi_i - \xi_j$)($i \neq j$) which is a sub-set of (4.5)	85
Part II	
MULTIVARIATE POWER-SERIES DISTRIBUTIONS	89
5. MULTIVARIATE POWER-SERIES DISTRIBUTIONS	89
5.1 Introduction and summary	89
5.2 Relations between cumulants and factorial cumulants	90
5.3 Properties of Power-series distributions	91
5.4 Illustrative examples	96
Appendix I : Certain Matrix Theorems	104
Appendix II : Certain Jacobian Theorems	124
Appendix III : Certain Integrals	128
