

C O N T E N T S

PART I - GENERAL

Chapter I	General Introduction	1
Chapter II	A Brief Review of Crystal Growth	8
Chapter III	Etch Pits and Dislocations in Metals	31
Chapter IV	Experimental Techniques	45

PART II - STUDIES ON ZINC CRYSTALS

Chapter V	A Study of the Effect of Growth rate and Impurities on the Orien- tation of Unseeded Zinc Single Crystals	52
Chapter VI	Microtopographic Studies on Zinc Crystals	70
Chapter VII	A Study of the Cellular Structure of the Interface in Zinc Crystals Using an Etch Method	86
Chapter VIII	A Detailed Study of the Etch Phenomena in Zinc Single Crystals	98
Chapter IX	A Study of Plastically Deformed Single Crystals of Zinc	117

PART III - STUDIES ON ANTIMONY CRYSTALS

Chapter X	Growth and Growth Features of Antimony Single Crystals	132
-----------	---	-----

Chapter	XI	A Study of Etch Phenomena in Antimony Crystals	146
		General Conclusions	156
		Acknowledgements
