PART I

CHAPTER 1 GENERAL INFORMATION ON CALCITE

1.1	Introduction	1
1.2	Occurrence	1
1.3	Crystal Composition	2
1.4	Calcite Group And Its Structure	3
1.51	Form And Habit	5
1.52	Cleavage, Gliding And Twinning	6
1.53	Percussion Mark	7
1.6	Properties Of Calcite Crystals	9
1.7	Uses	11

CHAPTER 2 EXPERIMENTAL TECHNIQUES

2.1	Introduction	13
2.2	Vickers Projection Microscope	14
2.3	Light Profile Microscopy	17
2.4	Multiple Beam Interferometry	19
2.5	Silvering Technique	21
2.6	Etch Method	24
2.7	Determination of Surface Traces On A Crystal Face	26

PART II

CHAPTER 3 CHEMICAL ETCHING (GENERAL)

3.1	Introduction	29
3.2	Etch Features On Crystal Surfaces	31
3.21	Etch Spirals	32
3.22	Etch Pits	33
3.23	Eccentricity Of Etch Pits	39
3.24	Orientation Of Etch pits	40
3.25	Dislocation Etch Pits	43
3.26	Etch Rows	45
3.3	Thermal Etching	48
3.4	Ionic Etching	49
3.5	Electrolytic Etching	49
3.6	Dehydration Etching	50
3.7	Theoretical Development	51

CHAPTER 4 EFFECT OF CONCENTRATION ON THE
SHAPE OF ETCH PITS ON CALCITE
CLEAVAGES.

4.1	Introduction	59
4.2	Experimental	61
4.3	Observations And Results	63
4.3 a	Change In Shape Of Etch Figures With Change In Concentration Of HCl.	63
4.3 b	Change In Shape Of Etch Figures With Change In Concentration of HAc.	74

4.3 c	Multiple Etching Of Isolated Cleavage Surfaces By Different Concentrations Of Various Etchants	82
4.3 d	Multiple Etching Of Matched Cleavage Surfaces By Different Concentrations Of Various Etchants	85
4.3 e	Orientation Of Etch Pits	87
4.4	Discussion	90
4.41	Origin Of Etch Pits	91
4.42	Shapes Of Etch Figures	96
4.43	Identical Shapes Of Etch pits	98
4.44	Cycles Of Etch Pit Shapes	101
4.45	Change In Orientation Of Etch pit ^s	106
4.5	Conclusions	109

CHAPTER 5 SHAPES OF ETCH PITS UNDER VARYING
CONDITIONS OF ETCHING OF CLEAVAGE
FACES OF CALCITE BY ETCHANT OF
CONSTANT CONCENTRATION

5.1	Introduction	111
5.2	Experimental Procedure	114
5.3	Observations And Results	115
5.31	Effect Of Dynamic Etching	116
5.32	Effect Of Time Of Etching	121
5.4	Discussion	123
5.5	Conclusions	129

CHAPTER 6 ECCENTRIC ETCH PITS ON
 CALCITE CLEAVAGES

6.1	Introduction	131
6.2	Experimental Procedure	134
6.3	Observations And Results	135
6.4	Discussion	144
6.5	Conclusions	159

PART III

CHAPTER 7 THERMAL ETCHING (GENERAL)

7.1	Introduction	161
7.2	Experimental Methods For Defect Studies	162
7.21	Decoration Technique	162
7.22	Ionic Etching	163
7.23	X-ray Diffraction	164
7.24	Electron Microscopy	164
7.25	Field-Ion Microscopy	165
7.26	Thermal Etching	166
7.3	Theoretical Development	174

CHAPTER 8 THERMAL ETCHING OF CALCITE
 CLEAVAGE SURFACES

8.1	Introduction	178
8.2	Experimental Procedure	179
8.3	Observations And Results	181
8.4	Discussion	192
8.5	Conclusions	205

PART IV

CHAPTER	9	DEHYDRATION FIGURES ON CLEAVAGE FACES OF SELENITE	
9.1	General Introduction On Selenite		207
9.11	Form And Habit		208
9.12	Crystal Structure		208
9.13	Cleavage And Twinning		209
9.14	Physical Properties		210
9.15	Chemical Properties		210
9.2	Dehydration Of Crystals		212
9.3	Experimental Procedure For Studying Dehydration Figures On Cleavage Surfaces Of Selenite		216
9.4	Observations, Results And Discussion		217
9.5	Conclusions		224

PART V

CHAPTER	10	MICROHARDNESS OF CRYSTALS (GENERAL)	
10.1	Introduction		225
10.2	Definitions And Measurements		226
10.21	Scratch Hardness		228
10.22	Abrasive Hardness		228
10.23	Dynamic Hardness		229
10.24	Static Hardness		230
10.3	Variation Of Hardness With Load		234

10.4	Orientation Variation	240
10.5	Indentation Technique	242
CHAPTER 11	OPTICAL STUDY OF MICROHARDNESS OF CALCITE CLEAVAGE FACES	
11.1	Introduction	248
11.2	Experimental Procedure	249
11.3	Observations, Results And Discussion	250
11.31	Variation of Microhardness With Load	250
11.32	Orientation Dependence of Microhardness	257
11.4	Conclusions	261
