Abstract	iii
Acknowledgement	vi
List of Figures	xi
List of Tables	xiii
Chapter 1: Introduction	1-36
1.1 Introduction.....	1
1.2 Brief description of existing dating method for quaternary sediments.....	4
1.3 Luminescence Dating- Basic Principle.....	10
1.4 Age Equation.....	12
1.5 Optical bleaching of sediment.....	14
1.6 Luminescence dating techniques.....	17
1.7 Estimation of bleaching using SAR.....	19
1.8 Estimating Paleodose from a dose distribution.....	20
1.9 Luminescence dating and Himalaya.....	22
1.10 The objective and scope of the thesis.....	23
1.10.1 Methodological aspects.....	23
1.10.2 Feasibility of sediment dating from Himalayan terrain and implications.....	24
1.11 Chapter wise details.....	26
References.....	29
Chapter 2: Experimental Procedures	37-60
2.1 Sample preparation.....	37
2.1.1 Coarse Grain separation technique.....	38
2.1.2 Fine grain separation technique.....	38
2.2 TL/OSL measurement.....	39
2.3 Laboratory irradiation and calibration of the beta dose source.....	39
2.4 Estimation of Paleodose.....	44
2.4.1 Multiple aliquot methods.....	44
2.4.1.1 Multiple aliquot additive dose method.....	44

2.4.1.2 Multiple aliquot regeneration method.....	46
2.4.1.3 Partial Bleach Method and Linearly Modulated OSL.....	47
2.4.2 Single Aliquot Regeneration.....	48
2.4.3 Natural sensitivity corrected SAR	50
2.5 Annual Dose Measurement.....	54
References.....	58
Chapter 3:Changes in natural OSL sensitivity of quartz: Implication to dating.....	61-69
3.1 Introduction.....	61
3.2 Experimental details and methods involved.....	62
3.3 Results and Discussions.....	65
References.....	69
Chapter 4: Limits and applicability of Standardized Growth Curve.....	70-79
4.1 Introduction.....	70
4.2 Concept and Methodology.....	71
4.3 Standard Growth Curve.....	72
4.3.1 Construction of SGC.....	72
4.3.2 Minimum aliquots needed for SGC.....	72
4.3.3. Universal SGC for an entire stratigraphic sequence.....	75
4.4 Results and summary.....	75
References.....	79
Chapter 5: Fluvial sediments in diverse depositional settings: Applicability of	
Luminescence dating.....	80-113
5.1 Flash flood deposit.....	82
5.1.1 Introduction.....	82
5.1.2 1970's Alaknanda Flood.....	82
5.1.3 Field stratigraphy and sampling details.....	83
5.1.4 Results and discussion.....	88
5.2 Low energy slack water deposit.....	93
5.2.1 Introduction	93
5.2.2 Field stratigraphy and sampling details.....	96
5.2.3 Results and discussion.....	96
5.3 High energy alluvial fan deposit.....	98

5.3.1 Introduction	98
5.3.2 Study area and climate.....	102
5.3.3 Field stratigraphy and sampling details.....	102
5.3.4 Results and discussion.....	103
5.4 Incised fluvial terraces.....	104
5.4.1 Introduction	104
5.4.2 Geomorphology, tectonic setting and sample location.....	106
5.4.3 Results and Discussion.....	107
References.....	111
Chapter 6: Implications of Luminescence Chronology.....	114-133
6.1 Flash flood and Terrace sediment	114
6.2 Slack water deposit at Raiwala (Haridwar).....	118
6.3 Chronology of Yamuna-Ganga mega-fan and piedmont fan sedimentation.....	122
6.4 Neo-tectonic activity in Darjeeling Himalayan.....	127
References.....	131
Chapter7: Conclusions and Future Outlook.....	134-137
7.1 Conclusions and Future Outlook.....	134
List of Publications.....	138-139
