Page

Chapter 1: Introduction

1.1 Age range and material used in various dating techniques for quaternary material.....	5
---	---

Chapter 2: Experimental Procedures

2.1 Source dose rate distribution in a single grain disk.....	42
2.2 Calculation of dose rate from known concentrations of radioactive elements.....	57

Chapter 3: Natural Sensitivity Changes During OSL Measurement

3.1 Effect of natural sensitivity correction on paleodoses.....	67
---	----

Chapter 4: Limits and Applicability of Standard Growth Curve

4.1 Variation in mean paleodose computed by varying no. of aliquots.....	77
4.2 Comparison of average of least 10% and total paleodoses obtained from SAR growth curve and SGC.....	78

Chapter 5: Fluvial sediments in diverse Depositional Settings

5.1 SAR paleodose for 1970's flood sediment and terrace T ₁ at Srinagar.....	89
5.2 Partial bleach and SAR paleodoses for slack water deposit at Raiwala, Haridwar.....	97
5.3 SAR paleodoses for Yamuna Ganga mega and piedmont fan sediments.....	105
5.4 SAR paleodoses for fluvial terraces in Tista valley.....	109

Chapter 6: Luminescence Chronology of Fluvial archives and their Implications

6.1 SAR ages for 1970's flood sediment and terrace T ₁ at Srinagar.....	116
6.2 Source of sediment from terrace T ₁ at Srinagar	121
6.3 SAR ages for slack water deposit at Raiwala, Haridwar.....	121
6.4 SAR ages for Yamuna Ganga mega and piedmont fan sediments.....	123
6.5 SAR ages for fluvial terraces in Tista valley.....	128
