

ACKNOWLEDGEMENT

I wish to express my deepest gratitude to Dr. Umesh Naik, my supervisor, whose invaluable guidance, support and encouragement have nourished this thesis research from beginning to completion. Although I had been working on it, at times I got stuck and faltered but finally could accomplish the task due to the research condition and environment and also the excellent supervision provided by him. All the time I spent with Dr. Umesh Naik during my study is a priceless treasure for me, and I will take it as guidance for my future career.

My deep gratitude is to my senior colleagues and colleagues at the institute, where I work, for shaping my thoughts and understanding on the subject at the initial stage. Many thanks are also due to my friends, for their assistance in various aspects of my research and for their support with constant friendship. I would also like to express my gratitude to the staff at my work place for their cooperation during the course of study, which helped me in completing the thesis work. I am grateful to the Faculty of Arts, in particular Department of Economics for providing a congenial environment during my study period.

Special thanks are given to my wife and kids for their understanding. I would particularly like to acknowledge my family for their affection and moral support. Their continual support and encouragement made it possible for me to concentrate and complete the work in time.
