

TABLE OF CONTENTS

ABSTRACT.....	1
Table of Contents	3
List of Figures.....	6
List of Tables.....	10
List of Abbreviation	11
List of Symbols.....	12
CHAPTER 1: INTRODUCTION.....	13
1.1 Background.....	13
1.2 Motivation of Present work	14
1.3 Problem Statements.....	15
1.4 Thesis Outline	16
CHAPTER 2: LITERATURE SURVEY	18
2.1 Introduction.....	18
2.1.1 Characteristics of Pure Magnesium	20
2.1.2 World Production and Consumption of Magnesium.....	21
2.2 Alloying Systems	23
2.2.1 Designation of Magnesium Alloy.....	23
2.2.2 Effect of Alloying Elements on Magnesium Alloys.....	25
2.2.3 Alloy Development.....	27
2.3 Applications of Magnesium Alloys.....	30
2.4 Effect of Manganese on Magnesium Alloys.....	34
2.4.1 Mg-Mn-O System (O- Other alloying element).....	36
2.4.2 Summary of Previous studies on Mg-Mn alloys	37
2.5 Effect of Copper on Magnesium Alloys.....	41
2.5.1 Summary of Previous Studies on Mg-Cu Alloys	41
2.6 Effect of Nickel on Magnesium Alloys.....	43
2.6.1 Summary of Previous Studies on Mg-Ni Alloys.....	44
2.7 Magnesium Melting Practice	46
2.7.1 Flux-less Method	46
2.7.2 Fluxing Method	47
2.8 Research Gap	48
2.9 Objective of The Work.....	49

CHAPTER 3: EXPERIMENTAL WORK.....	50
3.1 Overall Flowchart of Experimental work.....	50
3.2 Procurement of Raw Materials and Practical Work.....	51
3.3 Experimental Setup	52
3.4 Experimental Procedure	54
3.4.1 Part I: Develop the magnesium melting fluxes and identify the best among them	54
3.4.2 Part II: Effect of addition of various manganese sources on magnesium metal	57
3.4.3 Part III: Effect of temperature on solubility of manganese in magnesium	59
3.4.4 Part IV: Develop and study the Mg-Cu and Mg-Cu-Mn (CM) alloys	60
3.4.5 Part V: Develop and study the Mg-Ni and Mg-Ni-Mn (NM) alloys.....	61
3.5 Thermogravimetric/Differential Thermal Analysis	62
3.6 Metallography Process	63
3.7 Microstructure Observation	64
3.7.1 Optical Microscopy	64
3.7.2 Electron Microscopy (SEM)	65
3.8 XRD Analysis	66
3.9 Mechanical Testing	67
3.9.1 Hardness Testing	67
3.9.2 Tensile Testing	67
3.10 Density Measurement.....	69
3.11 Corrosion Rate Determination	70
CHAPTER 4: RESULTS & DISCUSSION	72
4.1 Raw Materials Analysis.....	72
4.2 Results & Discussion of Part I.....	74
4.2.1 Thermogravimetric/Differential Thermal Analysis of All Fluxes.....	74
4.2.2 Observation of Surface Layer of Flux on Magnesium	85
4.2.3 Chemical analysis of all Castings.....	86
4.2.4 Effect of fluxes on the weight of magnesium castings	87
4.2.5 Effect of fluxes on the mechanical properties of magnesium castings.....	88
4.3 Results & Discussion of Part II.....	89
4.3.1 Chemical Analysis of Developed Systems	89
4.3.2 Surface Morphology of All Manganese Forms	90
4.3.3 Manganese Recovery in Magnesium at 850°C	91

4.3.4 Microstructure Analysis of All Systems	92
4.3.5 Mechanical Properties.....	94
4.3.6 Corrosion Behaviour.....	95
4.4 Results & Discussion of Part III	97
4.4.1 Chemical Analysis of Developed Systems	97
4.4.2 Manganese Recovery in Magnesium at Different Temperatures	97
4.4.3 Microstructure Analysis of All Systems	98
4.4.4 Mechanical Properties.....	99
4.4.5 Corrosion Study.....	100
4.5 Results & Discussion of Part IV	101
4.5.1 Chemical Analysis of Developed Systems	101
4.5.2 Microstructure Analysis of All Systems by Optical Microscopy and SEM analysis	101
4.5.3 Mechanical Properties.....	104
4.5.4 Corrosion Behaviour.....	105
4.6 Results & Discussion of Part V.....	108
4.6.1 Chemical Analysis of Developed Systems:	108
4.6.2 Microstructure Analysis of All Systems by Optical Microscopy and SEM analysis	108
4.6.3 Mechanical Properties.....	111
4.6.4 Corrosion Behaviour.....	112
CHAPTER 5: CONCLUSIONS	116
5.1 Conclusions.....	116
5.2 Original Contribution by The Thesis.....	118
FUTURE WORK	119
REFERENCES.....	120
