

Acknowledgements

I would like to show my deepest gratitude for my research supervisor **Prof. Neelima Kulkarni** for providing me a wonderful opportunity of working under her and for her support, long hours of discussion, learning and valuable guidance. My knowledge and understanding of the subject has increased exponentially owing to the discussions with her and which is beyond conventional learning through books or internet.

I would like to thank Prof. A. V. Bedekar, Offg. Head, Prof. Shailesh R. Shah, Prof. Anjali Patel and Prof. N. D. Kulkarni, Ex-HOD, Dept. of Chemistry for providing infrastructural facilities without the help of which the work presented in the thesis would not have been possible.

I would like to thank Department of Science and Technology (DST) for the financial assistance in the form of DST-INSPIRE fellowship.

I am thankful to UGC and DST for various instrumentation facilities in the department under various programs.

I am also thankful to DST-FIST for funding NMR facility, UGC-CAS program for polarizing microscope and UGC-XII plan grant for Gaussian 16 software and computational facility in the Department of Chemistry at The Maharaja Sayajirao University of Baroda.

I would like to thank various instrumentation facilities for the analysis, SAIF-IITB for ESR analysis, O2h and SAIF-CDRI Lucknow for ESI-Mass analysis.

I would like to thank my collaborator Dr. Vandana Rao, Dept. of Metallurgy, Faculty of Technology, The Maharaja Sayajirao University of Baroda for SEM analysis.

I would like to thank Mr. Vinayak Valodkar and Mr. K.K. Patel, Solvay Specialties India Limited for carrying out the Rheology of the samples.

I am grateful to Advance Diagnostic Laboratory, Surat for performing the antimicrobial studies of the gels.

A special thanx to **Priyanka Salunke** who has been more like a mentor rather than a colleague. I am indebted to her for the never-ending support, help and cooperation.

‘Good ideas come over a cup of coffee’ and it was the same in my case. I am thankful to **Ms. Varsha Bhardwaj** for valuable insights and discussions over a cup of coffee.

Acknowledgements

I would also like to thank Prof. Suresh and Dr. Urja Verma, Dept. of Zoology, Faculty of Science, The Maharaja Sayajirao University of Baroda for carrying out biological activities of the compounds.

I would also like to thank Dr. Devkar and Dr. Aliasgar Vohra, Dept. of Zoology, Faculty of Science, The Maharaja Sayajirao University of Baroda for carrying out biological activities of the compounds

I would like to thank Dr. H. P. Soni for allowing the use the workstation for computational studies.

I would like to thank Dr. Vinay and Komal for allowing the use of UV-Visible spectrophotometer.

I would like to thank Dr. Anupama Ekbote for helping with the characterization studies.

I would like to specially thank the operators of NMR, IR, UV and Fluorescence spectrometers, for providing the data and carrying out the analysis as well as the teachers in-charge of all the instruments.

I would like to thank all my previous and present lab mates Dr. Rinky, Dr. Dushyant, Dr. Rama, Dr. Priyanka Khanvilkar, Ms. Nisha, Ms. Priyanka Salunke, Ms. Krutika, Ms. Lata and Mr. Naman for creating and maintaining a very healthy working environment and for providing guidance during the initial years of my work. I would also like to thank all the colleagues and peers many of whom have turned to be good friends during the course of this journey.

I would like to thank all the teaching and non-teaching staff of the department for providing assistance all these years.

Last but not the least, I would like to thank my **friends, parents, brother** and my extended family for their support during the ups and downs of this long journey and staying behind me through thick and thin. I would like to thank my wife, **Sanika** for patiently supporting me throughout the course of my journey. A special thanx to **Chotu** and **Bluzo** and all my furry friends for being real stressbusters.

Aditya Anil Puranik
