

# **TABLE OF CONTENTS**

## **CHAPTER 1: INTRODUCTION**

### **1.1 MEDICINAL PLANTS AND THEIR REQUIREMENT WORLDWIDE**

### **1.2 INDIAN MEDICINAL PLANTS**

#### **1.2.1 *Hemidesmus indicus* (L.) R. Br.**

##### **1.2.1.1 Secondary metabolites**

##### **1.2.1.2 Medicinal properties**

##### **1.2.1.3 Selection of this species**

### **1.3 PLANT TISSUE CULTURE**

### **1.4 SECONDARY METABOLITES**

#### **1.4.1 Production of Secondary Metabolites in Shoot Cultures**

##### **1.4.1.1 Qualitative and quantitative analysis of shoot cultures**

##### **1.4.1.2 Elicitation of secondary metabolites in shoot cultures**

#### **1.4.2 Gene Expression Analysis for Secondary Metabolite Pathway**

### **1.5 HYPOTHESIS**

### **1.6 OBJECTIVES**

## **CHAPTER 2: REVIEW OF LITERATURE**

### **2.1 REGENERATION STUDIES**

#### **2.1.1 Effect of PGRs on Shoot Regeneration from Leaf Explant**

#### **2.1.2 Effect of PGRs on Shoot Regeneration from Nodal Explant**

#### **2.1.3 Regeneration using *In Vitro* Nodes**

#### **2.1.4 Rooting of Shoots**

#### **2.1.5 *In Vitro* Studies in *Hemidesmus indicus***

### **2.2 SECONDARY METABOLITE STUDIES**

#### **2.2.1 Qualitative Analysis of Shoots**

#### **2.2.2 Quantification and Elicitation of Metabolites in Shoots**

##### **2.2.2.1 Medicinal properties of lupeol**

##### **2.2.2.2 Medicinal properties of rutin**

##### **2.2.2.3 Lupeol and rutin quantification**

##### **2.2.2.4 Elicitation of lupeol and rutin**

##### **2.2.2.5 Elicitation of metabolite using YE, SA and MJ**

### 2.2.3 Gene Expression Studies for Rutin Biosynthetic Pathway

## **CHAPTER 3: MATERIALS AND METHODS**

### **3.1 REGENERATION STUDIES**

#### 3.1.1 Plant Material

#### 3.1.2 Glasswares and Plasticwares

#### 3.1.3 Instruments

#### 3.1.4 Chemicals

##### 3.1.4.1 Plant growth regulators (AR grade, SRL, Mumbai, India)

##### 3.1.4.2 Others

#### 3.1.5 Stock and Media Preparation

##### 3.1.5.1 MS salts stock

##### 3.1.5.2 Stocks of plant growth regulators (PGRs)

##### 3.1.5.3 MS media preparation (1 l)

#### 3.1.6 Establishment of Shoot Culture

##### 3.1.6.1 Plant material

##### 3.1.6.2 Aseptic manipulations

##### 3.1.6.3 Establishment of shoot culture using leaf and nodal explant

##### 3.1.6.4 Culture Media

##### 3.1.6.5 Establishment of shoot culture using in vitro nodes

##### 3.1.6.6 Rooting of shoots

#### 3.1.7 Culture Conditions

### **3.2 SECONDARY METABOLITE STUDIES**

#### 3.2.1 Glasswares and Plasticwares

#### 3.2.2 Instruments

#### 3.2.3 Qualitative Analysis of Shoots

##### 3.2.3.1 Chemicals and reagent preparation

##### 3.2.3.2 Plant material

##### 3.2.3.3 Extract preparation

##### 3.2.3.4 Mobile phases and development of TLC plates

#### 3.2.4 Standard Curve Preparation

#### 3.2.5 Elicitation of Lupeol and Rutin

##### 3.2.5.1 Chemicals

##### 3.2.5.2 Elicitor stock preparation

3.2.5.3 Shoot culture establishment for elicitor feeding

3.2.5.4 Lupeol and rutin quantification

### 3.2.6 Gene Expression Analysis for Rutin Biosynthesis in Shoots

3.2.6.1 Plant material

3.2.6.2 Plasticwares

3.2.6.3 Instruments

3.2.6.4 Chemicals and reagents

3.2.6.5 RNA isolation

3.2.6.6 Agarose gel electrophoresis

3.2.6.7 Qualitative and quantitative analysis of RNA

3.2.6.8 cDNA synthesis from isolated RNA

3.2.6.9 cDNA analysis using  $\beta$ -actin amplification

3.2.6.10 Gene expression analysis

## 3.3 STATISTICAL ANALYSIS

## CHAPTER 4: RESULTS AND DISCUSSION

### 4.1 REGENERATION STUDIES

#### 4.1.1 Shoot Regeneration from Leaf Explant

4.1.1.1 Individual cytokinins (BA and Kn)

4.1.1.2 Individual auxins (IAA, NAA and 2,4-D)

4.1.1.3 Synergism of cytokinins (BA with Kn)

4.1.1.4 Synergism of BA with IAA/NAA

4.1.1.5 Synergism Kn with IAA/NAA

#### 4.1.2 Shoot Regeneration from Nodal Explant

4.1.2.1 Individual cytokinins (BA and Kn)

4.1.2.2 Individual auxins (IAA and NAA)

4.1.2.3 Synergism of BA and Kn

4.1.2.4 Synergism of BA with IAA/NAA

4.1.2.5 Synergism of Kn with IAA/NAA

4.1.2.6 Shoot culture establishment using in vitro nodes

#### 4.1.3 *In Vitro* Rooting

4.1.3.1 IBA

4.1.3.2 NAA

### 4.2 SECONDARY METABOLITE STUDIES

- 4.2.1 HPTLC Fingerprint of Shoots
- 4.2.2 HPTLC Analysis for Lupeol in Shoot Cultures
  - 4.2.2.1 Standard curve of lupeol
  - 4.2.2.2 Quantification of lupeol
  - 4.2.2.3 Elicitation studies for lupeol
- 4.2.3 HPTLC Analysis for Rutin in Shoot Cultures
  - 4.2.3.1 Standard curve of rutin
  - 4.2.3.2 Quantification of rutin
  - 4.2.3.3 Elicitation of rutin
  - 4.2.3.4 Gene expression analysis for F3'5'H and F3'H genes

## **CHAPTER 5: SUMMARY**

### **5.1 REGENERATION STUDIES**

- 5.1.1 Regeneration using Leaf Explant
- 5.1.2 Regeneration using Nodal Explant
- 5.1.3 Regeneration using *In Vitro* Nodes
- 5.1.4 *In vitro* Rooting of Shoots

### **5.2 SECONDARY METABOLITE STUDIES**

- 5.2.1 HPTLC Fingerprinting and Lupeol Quantification in Shoots
- 5.2.2 Elicitation of Lupeol
- 5.2.3 HPTLC Analysis for Rutin in Shoots along with Gene Expression Studies

## **CHAPTER 6: BIBLIOGRAPHY**

### **PULICATIONS AND PRESENTATIONS**
