

# LIST OF FIGURES

<b>Title of the figure</b>	<b>Page No.</b>
<b>Graphical abstract:</b> Role of TLR signaling in HNSCC Progression.....	xi
<b>Figure 1.1:</b> Toll-like receptor signaling pathway.....	14
<b>Figure 2.1:</b> Regions of head and neck.....	17
<b>Figure 2.2:</b> Statistics demonstrating incident cases and deaths of HNSCCs in India...	18
<b>Figure 2.3:</b> Region wise burden of various cancers and their major cause in India....	22
<b>Figure 2.4:</b> Mode of action of HPV E6 and E7 viral oncoproteins in malignant phenotype development.....	23
<b>Figure 2.5:</b> Chemical structure of cisplatin.....	30
<b>Figure 2.6:</b> Chemical structure of 5-FU.....	30
<b>Figure 2.7:</b> Chemical structure of docetaxel.....	30
<b>Figure 2.8:</b> EGFR signaling pathway.....	32
<b>Figure 2.9:</b> Immune checkpoint pathways and mechanism of action of checkpoint inhibitors.....	33
<b>Figure 2.10:</b> TLRs expression on different types of immune cells.....	34
<b>Figure 2.11:</b> Structure of a TLR.....	35
<b>Figure 2.12:</b> TLR signaling pathways.....	38
<b>Figure 2.13:</b> Domain structure of Human IRAK proteins with size, location and expression in cells.....	39
<b>Figure 2.14:</b> Formation of Myddosome complex.....	40
<b>Figure 2.15:</b> Expression of IRAKs in tumors cells according to the data by protein atlas.....	43
<b>Figure 2.16:</b> Drug targets of the TLR signaling pathway and therapeutic strategies to inhibit the signaling.....	47
<b>Figure 2.17:</b> Structure of IRAK-4 kinase demonstrating the inhibitor binding site.....	50

<b>Figure 2.18:</b> Chemical structures of IRAK inhibitors in clinic.....	51
<b>Figure 2.19:</b> Chemical structure of IRAK-1 &-4 dual inhibitor used in this study.....	51
<b>Figure 3.1:</b> Probable role of TLR signaling in HNSCC progression.....	53
<b>Figure 4.1:</b> Schematic protocol for the development of triple chemo-resistant cell line.....	58
<b>Figure 4.2:</b> Schematic illustration for the development of triple chemo-resistant cell line.....	58
<b>Figure 5.1:</b> Expression of TLRs in HNSCC cell line HEp-2.....	66
<b>Figure 5.2:</b> Evaluation of IRAKs and their phosphorylated forms in HNSCC cell line HEp-2.....	68
<b>Figure 5.3:</b> Effect of inhibition of the TLR signaling pathway on the viability of HNSCC cell line HEp-2.....	70
<b>Figure 5.4:</b> Effect of inhibition of the TLR signaling pathway on survival related proteins of HNSCC cell line HEp-2.....	71
<b>Figure 5.5:</b> Effect of inhibition of the TLR signaling pathway on the proliferative potential of HNSCC cell line HEp-2.....	72
<b>Figure 5.6:</b> Effect of inhibition of the TLR signaling pathway on CSCs using HNSCC cell line HEp-2.....	74
<b>Figure 5.7:</b> Effect of inhibition of the TLR signaling pathway on BST-2 expression and association of BST-2 with CSCs in HNSCC cell line HEp-2.....	75
<b>Figure 5.8:</b> Effect of inhibition of the TLR signaling pathway on the EMT of HNSCC cell line HEp-2.....	76
<b>Figure 5.9:</b> Effect of inhibition of the TLR signaling pathway on the metastasis of HNSCC cell line HEp-2.....	77
<b>Figure 5.10:</b> Effect of chemo-drug treatment on the viability of HEp-2 cell line.....	78
<b>Figure 5.11:</b> Assessment of morphological features of chemo-resistant cell line.....	80
<b>Figure 5.12:</b> Validation of the acquired chemo-resistance of the developed triple-chemo-resistant cell line.....	81
<b>Figure 5.13:</b> Expression of TLRs in chemo-resistant HEp-2 cell line.....	82

<b>Figure 5.14:</b> Comparative analysis of mRNA expression of TLRs 1-10 on parent and chemo-resistant HEp-2 cell line.....	83
<b>Figure 5.15:</b> IRAK-signaling in chemo-resistant HEp-2 cell line.....	84
<b>Figure 5.16:</b> Effect of IRAK-1 &-4 dual inhibitor treatment on the viability of chemo-resistant HEp-2 cell line.....	85
<b>Figure 5.17:</b> Effect of inhibition of the TLR signaling pathway on the expression of survival related proteins of chemo-resistant HEp-2 cell line.....	87
<b>Figure 5.18:</b> Effect of inhibition of the TLR signaling pathway on the proliferative potential of chemo-resistant HEp-2 cell line.....	88
<b>Figure 5.19:</b> Effect of inhibition of the TLR signaling pathway on the CD44 and Nanog expression of chemo-resistant HEp-2 cell line.....	90
<b>Figure 5.20:</b> Effect of inhibition of the TLR signaling pathway on the ALDH1 expression in chemo-resistant HEp-2 cell line.....	91
<b>Figure 5.21:</b> Effect of inhibition of the TLR signaling pathway on the BST-2 expression of chemo-resistant HEp-2 cell line.....	91
<b>Figure 5.22:</b> Effect of inhibition of the TLR signaling pathway on the EMT of chemo-resistant HEp-2 cell line.....	93
<b>Figure 5.23:</b> Effect of inhibition of the TLR signaling pathway on metastasis of chemo-resistant HEp-2 cell line.....	94
<b>Figure 5.24:</b> Effect of combination treatment of docetaxel and IRAK-1 &-4 dual inhibitor on the viability of parent and chemo-resistant HEp-2 cell lines.....	96
<b>Figure 5.25:</b> Effect of combination treatment of cisplatin and IRAK-1 &-4 dual inhibitor on the viability of parent and chemo-resistant HEp-2 cell lines.....	97
<b>Figure 5.26:</b> Effect of combination treatment of 5-FU and IRAK-1 &-4 dual inhibitor on the viability of parent and chemo-resistant HEp-2 cell lines.....	98
<b>Figure 5.27:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the mRNA fold expression of <i>Bcl-2</i> and <i>Bcl-xL</i> of chemo-resistant HEp-2 cell line.....	100
<b>Figure 5.28:</b> Representative histogram images demonstrating the effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the Ki-67 expression of parent and chemo-resistant HEp-2 cell lines.....	102

<b>Figure 5.29:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the Ki-67 expression of parent and chemo-resistant HEP-2 cell lines.....	103
<b>Figure 5.30:</b> Representative histogram images demonstrating the effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the CD44 expression of parent and chemo-resistant HEP-2 cell lines.....	105
<b>Figure 5.31:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the CD44 expression of parent and chemo-resistant HEP-2 cell lines.....	106
<b>Figure 5.32:</b> Representative histogram images demonstrating the effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the Nanog expression of parent and chemo-resistant HEP-2 cell lines.....	108
<b>Figure 5.33:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the Nanog expression of parent and chemo-resistant HEP-2 cell lines.....	109
<b>Figure 5.34:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the ALDH1 expression of chemo-resistant HEP-2 cell line...	110
<b>Figure 5.35:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the E-cadherin expression of chemo-resistant HEP-2 cell line..	112
<b>Figure 5.36:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the Vimentin expression of chemo-resistant HEP-2 cell line..	113
<b>Figure 5.37:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the mRNA fold expression of <i>MMP-2</i> mRNA and IL-6 levels of chemo-resistant HEP-2 cell line.....	115
<b>Figure 5.38:</b> Representative histogram images showing the effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the BST-2 expression of parent and chemo-resistant HEP-2 cell lines.....	117
<b>Figure 5.39:</b> Effect of combination treatment of individual chemo-drugs and IRAK-1 &-4 dual inhibitor on the BST-2 expression of parent and chemo-resistant HEP-2 cell lines.....	118
<b>Figure 6.1:</b> TCGA data-based analysis of BST-2 expression in HNSCC.....	121
