

LIST OF FIGURES

Figure	Title	After Page
1.	Schematic Cross Sections of the Skin	11
2.	Schema of Events for Percutaneous Absorption	12
3-1	Standard Curve of Triamcinolone Acetonide	110
3-2	Standard Curve of Betamethasone 17-Valerate	112
3-3	Standard Curve of Maltcinonide	115
3-4	Standard Curve of Fluocinolone Acetonide	117
4-1 to 4-14	Rheograms of the Cream Base Nos. 1 to 27	105
5-1	<u>In vitro</u> Drug Release Apparatus	219
5-2 to 5-8	Release of Triamcinolone Acetonide from Creams	222
5-9 to 5-14	Release of Betamethasone 17-Valerate from Creams	223
5-15 to 5-19	Release of Maltcinonide from Creams	224
5-20 to 5-23	Release of Fluocinolone Acetonide from Creams	225
6-1	Sartorius Ointment Chamber Assembly	229
6-2	Cross Section of the Sartorius Ointment Chamber	229
6-3	Liberation of Triamcinolone Acetonide from Creams through Sartorius Ointment Chamber Assembly	233
6-4	Liberation of Betamethasone 17-Valerate from Creams through Sartorius Ointment Chamber Assembly	233

Figure	Title	After Page
6-5	Liberation of Maltcinonide from Creams through Sartorius Ointment Chamber Assembly	234
6-6	Liberation of Fluocinolone Acetonide from Creams through Sartorius Ointment Chamber Assembly	234
7-1	Application of adhesive plaster tape for producing inflammation by stripping	276
7-2	Application of adhesive plaster tape with punched out holes for applying creams containing corticosteroids	276
7-3	The punched holes are filled with comparative corticosteroid formulations and covered over with plaster tape again. The hand is bandaged by crepe bandage to hold application firmly on to the skin	276
7-4	Slight zones of anti-inflammatory effect of creams containing corticosteroid 6 hours after their application	276
7-5	Anti-inflammatory effect 9 hrs post application of creams	276
7-6	Anti-inflammatory effect after 12 hrs of application of creams	276
7-7	Anti-inflammatory effect virtually disappearing 36 hrs after application of creams	276
8-1	Percentage Total Possible Score as a Function of time for Triamcinolone Acetonide Creams	277
8-2	Percentage Total Possible Score as a function of time for Betamethasone 17-Valerate Creams	278
8-3	Percentage Total Possible Score as a function of time for Maltcinonide Creams	279
8-4	Percentage Total Possible Score as a function of time for Fluocinolone Acetonide Creams	280
