Chapter 1	Introduction	1
	References	6
Chapter 2	Experimental Techniques for high pressure research and measurement of phonons	8
	2.1 Introduction	8
	2.2 Challenges in Experimental Techniques	8
	2.2.1 Dynamic Methods	10
	2.2.1 I Ultrasonic Techniques	10
	2.2.1 II Shockwave Techniques	11
	(a) Contact Explosives	12
	(b) Flyer Plate Techniques	13
	(c) Projectile Impact Technique	13
	2.2.1 III Measurement Techniques	14
	2.2.2 Static Methods	15
	2.2.2 I Piston Cylinder Method	15
	2.2.2 II Diamond Anvil Cell Technique	16
	2.2.2 III Pressure scale and Pressure Calibration	19
	2.3 Measurement of Phonons	20
	2.3.1 Raman Scattering	21
	2.3.2 Brillouin scattering	23
	2.3.2 I Elasto-Optical Scattering Mechanism	24
	2.3.2 II Ripple Mechanism	26
	2.3.3 Neutron scattering	28
	2.3.3 I Inelastic Neutron Scattering	28
	2.3.3 II Elastic Neutron Scattering	29
	References	31
Chapter 3	General Theory of Lattice Vibration and Present Theoretical Models	32
	3.1 Introduction	32
	3.2 General Theory of Lattice Vibrations	33
	3.2.1 The Cyclic Boundary Condition	33
	3.2.2 The Adiabatic approximation	34
	3.2.2 I General Notations	34
	3.2.2 II The Hamiltonian in Harmonic Approximation	35
	3.2.2 III The Dynamical Matrix	37
	3.3 Present Model Theories	39
	3.3.1 Rigid Ion Model	40
	3.3.2 Shell Model	46
	3.3.3 Deformation Dipole Model	46
	3.3.4 Deformation Bond Approximation Model	48
	3.3.4 (a) Acoustic Response: The Elastic Constants	55
	3.3.4 (b) Optical Response: The Dielectric Properties	56
	3.4 Many Body Interactions Theories	57
	References	60

Contents

Chapter 4	Phonon Properties of III-V Nitrides Under Pressure	63
4.1	Introduction	63
4.2	Theoretical Consideration	66
4.3	Results and discussion	72
4.3.1	Phonon Dispersion Curves	72
4.3.2	Phonon Density of States	78
4.3.3	Mode Grüneisen Parameter	79
4.3.4	Lattice Specific Heat at Constant Volume	82
4.4	Conclusion	83
	References	84
Chapter 5	Effect of Pressure on Phonon Properties of III-V Phosphides	88
5.1	Introduction	88
5.2	The Present calculation	90
5.3	Results and Discussion	96
5.3.1	Phonon Dispersion Curves	96
5.3.2	Phonon Density of states	101
5.3.3	Mode Grüneisen Parameter	104
5.3.4	Lattice Specific Heat at Constant Volume	107
5.4	Conclusion	107
	References	109
Chapter 6	Structural, Elastic, Mechanical and Anharmonic Properties of II-VI and III-V Diluted Magnetic Semiconductors	111
6.1	Introduction	111
6.2	Theoretical consideration	113
6.3	Results and discussion	118
6.3.1	$Zn_{1-x}M_xSe$ (M: Cd, Fe, Mn) at High Pressure	118
6.3.2	Mechanical, Elastic and Anharmonic Properties of $Zn_{1-x}Cr_xTe$	124
6.4	Conclusion	126
	References	128
Chapter 7	Summary	131
	Curriculum Vitae and List of Publications	136
