

ACKNOWLEDGEMENTS

It is with a deep sense of gratitude, I dedicate this work to the memory of my revered guide - late Prof. A.R. Chavan - without whose guidance and help, this work would have been impossible. I also wish to express my indebtedness to Prof. C.H. Pathak, Head, Department of Botany, M.S. University of Baroda, ^{who} was kind enough to accept me as his student after the sudden death of Prof. Chavan in May, 1967 and to help me in the write up of the thesis.

My special thanks are due to Prof. M.B. Raizada, F.N.I., for extending all possible help during my stay at the Forest Research Institute, Dehra Dun. I am also thankful to Prof. P.V. Bole for extending help during my work at the Blatter's herbarium and library.

Sincere thanks are due to Dr. H. Santapau, Director and Dr. K. Subramanyam, Jt. Director, Botanical Survey of India for their help in the determination of some plants and also for the stimulating hours of discussion, I had with them during the summer school in Botany at Kodaikanal held in June, 1962.

I greatly appreciate the help rendered by the authorities at Kew Gardens and herbarium in the proper determination of

a number of plants. I must thank staff of the various Indian herbaria, where I have been sending plant specimens for confirmation.

I am extremely thankful to my colleagues, Messrs. S.J. Bedi, R.P. Bhatt and M.C. Kulkarni for their help at every stage of the work.

My special thanks to Mrs. Kumud Sabnis for her help in checking the manuscript.

Lastly I have to thank Mr. P.T. Dindorkar for the photography work and Mr. J.S. Kelkar for doing an excellent job of typing.

Baroda
25th December, 1967

(S.D. Sabnis)
