

ACKNOWLEDGEMENT

I herein record my sincere gratitude and indebtedness to Dr. A. V. Ramachandran, Reader in Zoology, M. S. University of Baroda, Baroda for suggesting the problem, continuous guidance and encouragement throughout the tenure of the present work.

I am thankful to Prof. R. V. Shah, former Head, Department of Zoology for providing facilities to conduct the work and also for his valuable suggestions and constructive criticism throughout the course of the work. I also take this opportunity to thank Prof. P. M. Ambadkar, present Head, Department of Zoology for providing facilities and his encouragement.

I am also thankful to Dr. (Miss) M. V. Asnani for sparing her valuable time in preparing the thesis without whose help the thesis would not have been in the present form. Thanks are also due to Dr. (Miss) N. F. Gangaramani for the help rendered.

I am thankful to Mrs. N. Salinukul for giving valuable assistance for the preparation of this thesis. I also thank all my colleagues and friends who have helped me in one way or other all throughout the course of the present studies.

I express my sincere thanks to M. S. University of Baroda for granting a Research Assistantship in a Scheme during which the present work was carried out.
