CHAPTER 1

INTRODUCTION

1.1.Abstract.....	2
1.2.Touch response in plant.....	3
1.3.Receptors for touch.....	4
1.4.Thigmomorphogenesis.....	5
1.5.Intracellular signalling molecules.....	6
1.5.1. Reactive oxygen species.....	6
1.5.2. Calcium.....	6
1.5.3. Touch responsive genes.....	7
1.5.4. Phytohormones.....	8
1.5.5. Other signalling molecules.....	10
1.6.How does plant cell perceive touch?.....	11
1.7.Application of mechanical stimuli for stress tolerance.....	12
1.8.Scope of present study.....	13
1.9.References.....	13

CHAPTER 2

EXPOSURE TO REGULAR MECHANICAL STRESS INDUCES MULTIPLE PHYSIOLOGICAL CHANGES IN *CAJANUS CAJAN* (L) MILLSP

2.1.Abstract.....	23
2.2.Introduction.....	24
2.3.Materials and methods.....	26
2.3.1. Plant growth and treatment.....	26

2.3.2. Anatomical study.....	26
2.3.3. Detection of ROS production.....	27
2.3.4. Chlorophyll estimation.....	27
2.3.5. Statistical analysis.....	28
2.4.Results.....	28
2.4.1. Regular touch treatment suppresses overall growth of <i>C. cajan</i>	28
2.4.2. Touch treatment alters anatomy of stem tissue.....	29
2.4.3. Touch treatment alters nyctinasty movement of leaves in <i>C. cajan</i>	32
2.4.4. Touch stimulus induces ROS production in <i>C. cajan</i>	34
2.4.5. Regular touch treatment alters chlorophyll content in <i>C. cajan</i>	35
2.4.6. Touch treatment affects root nodule development in <i>C. cajan</i>	35
2.4.7. Touch treatment enhances pod development in <i>C. cajan</i>	37
2.5.Discussion.....	38
2.6.Conclusion.....	44
2.7.References.....	44

CHAPTER 3

STUDY OF TOUCH INDUCED TCH GENE ORTHOLOGUES IN CAJANUS CAJAN

3.1. Abstract.....	51
3.2. Introduction.....	52
3.3. Materials and methods.....	53
3.3.1. Bioinformatic analysis of TCH genes in <i>C. cajan</i>	54
3.3.2. Multiple sequence alignment of Arabidopsis and <i>C. cajan</i> TCH genes.....	54
3.3.3. RT-PCR and Quantitative PCR analysis.....	54
3.3.4. Statistical analysis.....	55
3.3.5. FASTA Sequences of TCH genes used for Bioinformatic Analysis.....	55
3.4. Results:.....	60
3.4.1. Identification of Arabidopsis TCH gene orthologues in <i>C. cajan</i>	60
3.4.2. DNA sequence comparison of TCH orthologues.....	61
3.4.3. Expression of TCH2 orthologues is upregulated upon touch treatment.....	65
3.5.Discussion.....	66
3.6.Conclusions.....	68
3.7.References.....	68

CHAPTER 4

RICE, A MONOCOT CROP SHOWS THIGMONORPHOGENESIS AND MULTIPLE ADAPTATIONS IN RESPONSE TO TOUCH.

4.1. Abstract.....	72
4.2.Introduction.....	73
4.3.Materials and methods.....	74
4.3.1. Plant growth and treatments.....	74
4.3.2. Detection of ROS production.....	74
4.3.3. Chlorophyll estimation.....	75
4.3.4. Bioinformatic analysis of TCH genes in <i>C. cajan</i>	75
4.3.5. Multiple sequence alignment of Arabidopsis and <i>C. cajan</i> TCH genes.....	76
4.3.6. RT-PCR and Quantitative PCR analysis.....	76
4.3.7. Statistical analysis.....	76
4.4.Results.....	77
4.4.1. Regular mechanical stress suppresses growth of rice seedlings.....	77
4.4.2. Regular mechanical stress induces production of ROS in rice seedlings.....	77
4.4.3. Regular mechanical stress reduces total chlorophyll content in rice seedlings.....	81
4.4.4. Identification of Arabidopsis TCH gene orthologues in rice	82
4.4.5. The identified three putative TCH1 orthologues are not expressed after mechanical stimuli in rice seedling.....	83
4.4.6. FASTA Sequences of Rice TCH genes used for Bioinformatic Analysis.....	84
4.4.7. Mechanical stress induced expression of JA responsive genes in rice seedlings..	85
4.5.Discussion.....	86
4.6.Conclusions.....	88
4.7.References.....	88
FUTURE DIRECTION OF PRESENT STUDY.....	93
