

List of Tables

Table No.	Title of the Table	Page Number
3.1	Macroeconomic progress during of the Indian economy during 1991-92 to 1995-95	123
3.2	Macroeconomic Developments during 1996-97 to 2000-01	131
3.3	Macroeconomic developments during 2001-02 to 2005-06	136
3.4	Macroeconomic developments during 2006-07 to 2010-11	141
3.5	Macroeconomic developments during the period 2011-12 to 2015-16	150
3.6	Macroeconomic developments during the period 2016-17 to 2021-22	155
3.7	Macroeconomic performance of the Indian economy since the reforms	159
4.1	Descriptive statistical estimates of the macroeconomic variables across the entire sample period	189
4.2	Correlation Structure among the macroeconomic variables throughout the sample period	193
4.3	Bai-Perron test for structural breaks in the key variables during the sample period	202
4.4	Stationarity dimensions of selected variables across the sample period	206
4.5	Zivot-Andrews stationarity test for variables with structural breaks	207
4.6	Expected behavior of the coefficients from Equation 13	219
4.7	Empirical estimates of import price pass-through in India based on Equation 13	221
4.8	Empirical estimates of import price pass-through in India based on Equation 14	226
4.9	Alternative empirical specification of import price pass-through in India based on Equation 14	229
4.10	Empirical estimates of the interactions between exchange rate and macroeconomic factors affecting pass-through	233
4.11	Estimates of the time-varying exchange rate pass-through coefficient for aggregate import prices in India	238
4.12	Test for non-stationarity in the time-varying pass-through coefficient	239
4.13	Test for equality of mean and variance between the time-variant and time-invariant coefficients of import price pass-through	240
4.14	Empirical estimates of the factors affecting the stability of the time-varying import pass-through coefficient	243
5.1	Descriptive statistical estimates of the macroeconomic variables across the entire sample period	291

5.2	Correlation structure among the selected macroeconomic variables	295
5.3	Stationarity tests for the selected variables	297
5.4	Anticipated behavior from the coefficients in equation one	300
5.5	Extent of exchange rate pass-through to domestic inflation for the period 1996:Q1 to 2022:Q1	302
5.6	Alternative perspectives on exchange rate pass-through in India vis-à-vis the first baseline model	305
5.7	Expected behavior from the coefficients in equation one	308
5.8	Alternative perspectives on exchange rate pass-through in India vis-à-vis the baseline model in equation two	309
5.9	Alternative perspectives on exchange rate pass-through in India vis-à-vis the baseline model in equation two	309
5.10	Extent of exchange rate pass-through to domestic inflation for annual data during the period 1993-94 to 2021-22	312
5.11	Estimates of the exchange rate pass-through coefficient for rolling windows for the baseline model one	313
5.12	Restrictions imposed on the reduced-form VAR for identifying the SVAR model	324
5.13	Short-run pass-through, Long-run pass-through and dynamic ERPT elasticity	331
5.14	Variance decomposition estimates for WPI and CPI to all the four structural shocks	336
6.1	Measurement of Asymmetry variables in the present study	354
6.2	Test for non-linearity in the models for import price pass-through	360
6.3	Directional asymmetry in ERPT to import prices in India via the dummy variables approach	361
6.4	Directional asymmetries in ERPT to import prices through the polynomial approach	362
6.5	Size asymmetry in ERPT to import prices within the first approach	364
6.6	Size asymmetry in ERPT to import prices within the second approach	366
6.7	Size asymmetries in ERPT to import prices within the third approach	367
6.8	Composite asymmetries in the ERPT to import prices	368
6.9	Directional asymmetries in ERPT to domestic prices	375

6.10	Size asymmetries in ERPT to domestic prices	377
6.11	Composite asymmetries in ERPT to domestic prices	379
7.1	Grid of short-run pass-through coefficients from exchange rate to prices in India	390
7.2	Grid of long-run pass-through coefficients from exchange rate to prices in India	391
