

List of Figures

Figure No.	Title of the Figure	Page Number
1.1	Movements of the bilateral and effective exchange rates of the Indian rupee across the sample period	14
1.2	Inflationary environment in India across 1991-92 to 2021-22	15
1.3	Co-movements in exchange rate and import prices in India	16
4.1	Major imports suppliers of India since the reforms	171
4.2	Oil versus non-oil imports in India since the reforms	172
4.3	Direction of trade across country groupings for India since the economic reforms	173
4.4	Theoretical sources of mark-up variations affecting import prices in India	182
4.5	Behavior of the selected macroeconomic variables across the entire sample period	196
4.6	Behavior of the selected macroeconomic variables across the entire sample period	197
4.7	Behavior of the selected macroeconomic variables across the entire sample period	198
4.8	Time series plot of residuals estimated from equation 13	222
4.9	Residuals from the estimated equation for the determinants of import price inflation	229
4.10	Residuals from the estimated equation of interactions between exchange rate and macroeconomic sources of import price pass-through	234
4.11	Rolling regression estimates of the baseline model from Equation 14	236
4.12	Time-Varying coefficient of exchange rate pass-through to import prices	239
5.1	Time-variant oil price pass-through and inflation persistence in India	315
5.2	Stability of the estimated VAR system	329
5.3	Accumulated Impulse Responses of domestic prices to structural innovation in exchange rate	330
5.4	Accumulated impulse Responses of consumer price inflation to structural innovation in wholesale price inflation	331
5.5	Sources of wholesale price inflation in India within the pass-through mechanism	333
5.6	Sources of consumer price inflation in India within the pass-through mechanism	334

5.7	Impulse Responses of RGDP to structural innovations in exchange rate and domestic prices	335
