Chapters

1. Introduction
2. Rationale and hypothesis
3. Objectives
4. Methodology
 - 4.1 Study area
 - 4.2 Human ethical clearance
 - 4.3 Informed consent
 - 4.4 Ethnobotanical survey of the traditional practices
 - 4.4.1 Study design
 - 4.4.2 Sample size
 - 4.4.3 Inclusion and exclusion criteria
 - 4.4.4 Data collection
 - 4.4.5 Data analysis
 - 4.5 Prospective clinical study of women using herbs
 - 4.5.1 Study design

- 4.5.2 Sample size
 - 4.5.3 Inclusion and exclusion criteria
 - 4.5.4 Clinical data collection
 - 4.5.5 Data analysis
- 4.6 Herbal ingredient analysis of batrisu vasanu products
 - 4.6.1 Selection of a traditional practice – Batrisu vasanu
 - 4.6.2 Collection of samples
 - 4.6.3 Analysis of ingredients from on-pack info
- 4.7 Phytochemical screening of Batrisu vasanu samples
 - 4.7.1 Sample preparation
 - 4.7.2 Biochemical estimations for total phenols
 - 4.7.3 Estimation of total flavonoids
 - 4.7.4 Estimation of total flavonols
 - 4.7.5 DPPH radical scavenging assay
 - 4.7.6 FRAP assay
 - 4.7.7 Total antioxidant capacity
- 4.8 Animal studies for Batrisu vasanu
 - 4.8.1 Animal ethics
 - 4.8.2 Maintenance of the animals
 - 4.8.3 Dosage and treatment
 - 4.8.4 Hematological and serological testing
 - 4.8.5 Statistical analysis
- 5. Ethnobotanical practices
 - 5.1 Socio-demographic characters of the study population
 - 5.2 Attitude of respondents towards traditional practices
 - 5.3 Traditional practices: Knowledge and satisfaction level
 - 5.4 Bivariate analysis to predict the associated factors of traditional practice
 - 5.5 Multiple logistic regression analysis outcomes

- 5.6 Ethnobotanical report of plant species used by respondents
- 6. Clinical study on herbal use
 - 6.1 Demographic characters of the study population
 - 6.2 Practices, knowledge, and satisfaction of the herbal medicines
 - 6.3 Clinical history at first visit to clinic
 - 6.4 Clinical report of mother at parturition
 - 6.5 Clinical details of the mothers at postpartum visit
 - 6.6 Growth parameters of the newborn
- 7. Validation of Batrisu vasanu in rat model
 - 7.1 Sample characteristic for collected products of Batrisu vasanu
 - 7.2 Botanical variability in collected products of Batrisu vasanu
 - 7.3 Botanical details of the plants found in Batrisu vasanu
 - 7.4 Biochemical tests of collected Batrisu vasanu products
 - 7.5 Body weight and food efficiency ratio in Batrisu vasanu fed rats
 - 7.6 Hematological parameters
 - 7.7 Serological parameters
- 8. Discussions
- 9. Conclusions
- 10. References

Publication

Conference certificates

Annexture 1: Human ethical clearance certificate

Annexture 2: Informed consent forms

Annexture 3: Questionnaire for ethnobotanical study

Annexture 4: Questionnaire for clinical study

Annexture 5: Clinical proforma for antenatal and postpartum study

Annexture 6: Animal ethical clearance certificate
