

Table of Contents

Abstract	I-III
-----------------	--------------

List of Abbreviations and Symbol	IV-VI
---	--------------

Chapter 1. General Introduction	1-36
--	-------------

1.1.	Surface Active Agents or Surfactants	2
1.2.	Solution Behaviour of Surfactants	6
1.3.	Aggregation Behaviour of Surfactants	7
1.4.	Mixed Micellization	11
1.5.	Micellar Morphologies in Aqueous Solution	12
1.6.	Micellar Solubilization	14
1.7.	Micellar Solution as Drug Delivery Vehicle	15
1.8.	Relevance of Research Work	16
1.9.	Constitution of the Thesis	18
	References	19

Chapter 2. Materials and Methods	37-58
---	--------------

2.1.	Materials	38
2.1.1.	Synthesis of Gemini Surfactants	41
2.1.1.1.	Synthesis of Anionic Gemini Surfactant	41
2.1.1.2.	Synthesis of Cationic Gemini Surfactants	43
2.1.2.	Characterization of Synthesized Gemini Surfactants	47
2.1.2.1.	Characterization of 12-4-12A	47
2.1.2.2.	Characterization of Cationic Geminis	48
2.1.3.	Thermal Stability of Cationic Geminis	53
2.2.	Methodologies	54
2.2.1.	Conductometric Measurements	54
2.2.2.	Steady-state Fluorescence Measurements	54
2.2.3.	DLS/Zeta (ζ) -Potential Measurements	55
2.2.4.	Transmission Electron Microscopy	55
2.2.5.	Solubilization Investigations	55

2.2.6. In-vitro Drug Release and Kinetics	55
2.2.7. In-vitro Antioxidant Activity	56
2.2.8. In-vitro Cell Proliferation Studies	56
References	57

Chapter 3. Association Behaviour and Interactions of Oppositely Charged

Gemini Surfactants in Aqueous Solution 59-93

3.1. Introduction	60
3.2. Results and Discussion	62
3.2.1. Micellization Process and CMC Values	62
3.2.2. CMC Data Treatment and Interaction between Geminis	78
3.2.3. Mixed Micellar Microenvironment	84
References	90

Chapter 4. Composition Triggered Morphologies of Mixed Oppositely

Charged Geminis having Different Chain Length and Spacers 94-114

4.1. Introduction	95
4.2. Results and Discussion	96
4.2.1. DLS studies on Blended Gemini Systems	97
4.2.2. Zeta (ζ)-potential Data	102
4.2.3. TEM Micrographs of Blended Micelles	104
References	110

Chapter 5. Counter Charged Geminis Mixture for Solubilization/ Release of

RLX 115-127

5.1. Introduction	116
5.2. Results and Discussion	117
5.2.1. RLX Solubilization	117
5.2.2. RLX release study	122
5.2.3. Cell proliferation activity	124
References	126

Chapter 6. Amplification of Curcumin Entrapment/Release in Aqueous Counter Charged Gemini Mixtures.....128-152

6.1.	Introduction.....	129
6.2.	Results and Discussion.....	131
6.2.1.	CUR Solubilization.....	131
6.2.2.	<i>In-vitro</i> CUR release study.....	137
6.2.3.	<i>In-vitro</i> antioxidant activity.....	142
6.2.4.	<i>In-vitro</i> cell proliferation activity.....	144
	References.....	148

Chapter 7. Solubilization of Polycyclic Aromatic Hydrocarbons (PAHs) in Individual and Mixed Geminis: Implication of Blending.....153-168

7.1.	Introduction.....	154
7.2.	Results and Discussion.....	156
7.2.1.	Solubilization of PAHs.....	156
	References.....	166

Chapter 8. Overall Conclusion.....169-171

List of Publications.....172
